

MERCY NJERI KIMARU

Technical Sales Engineer | Biomedical Engineer

njerikimaru7@gmail.com • +254 705 604 935 • Nairobi, Kenya • [GitHub](#) • [LinkedIn](#)

PROFILE

Biomedical Engineer with hands-on clinical equipment and hospital IT experience across two healthcare institutions, combined with strong technical communication and relationship-building skills. Comfortable explaining complex medical equipment and data systems to non-technical stakeholders. Seeking to bring this clinical fluency and client-facing problem-solving into a technical sales role connecting healthcare providers with the right equipment solutions.

KEY STRENGTHS FOR TECHNICAL SALES

- Client-facing technical communication: explained device functionality, compliance requirements, and IT integration.
- Relationship-building across teams: collaborated daily with clinical engineers, IT staff, and hospital departments to resolve equipment and connectivity issues.
- Product & domain knowledge: ground-level understanding of medical equipment, EMR/HIS workflows, and hospital operational needs, directly relevant to positioning Accord's products.
- Problem-solving under pressure: diagnosed and resolved live equipment faults and data transmission issues across 10+ connected biomedical systems with zero reported errors.

EXPERIENCE

Biomedical Engineer Intern | Kenyatta National Hospital, Nairobi *Jun 2024 – Aug 2024*

- Supported integration of 15+ biomedical devices with the hospital information system (HIS) and EMR platforms, troubleshooting connectivity issues directly with clinical staff, comparable to supporting a customer's device integration.
- Conducted safety and performance checks per healthcare regulatory standards; collaborated with a 5-person clinical team, maintaining data integrity across 10+ connected systems with zero reported transmission errors.

Biomedical Engineer Intern | Aga Khan Hospital, Mombasa *Jul 2023 – Aug 2023*

- Performed preventive maintenance and fault diagnosis on diagnostic and therapeutic equipment, working directly with clinical end users to understand operational needs.
- Trained clinical staff on safe equipment operation, translating technical specs into practical guidance, and gained hands-on exposure to EMR/EHR workflows and device-IT integration.

TECHNICAL & DOMAIN SKILLS

Clinical / BME: Medical equipment maintenance & calibration, EMR/EHR integration, HIS, biomedical device workflows, healthcare regulatory compliance

Healthcare IT: Data integrity, audit logging, access control, network security, secure health data transmission

Sales-Relevant: Client communication, technical presentation, relationship management, needs assessment

EDUCATION & CERTIFICATIONS

B.Tech, Biomedical Engineering — Technical University of Mombasa (Second Class Upper), June 2025

Data Science, AI & ML — LuxDevHQ, Nairobi (Jun – Nov 2025)

Software Development Certification — Tech4Dev (Nov 2025)
