

PERIS NGURO KURIA

Biomedical Engineer

Nationality: Kenyan

Email: peris3442@gmail.com

Phone: +254 743 385 814

Date of Birth: 30th May 2002

Religion: Christian

PROFESSIONAL SUMMARY

I am committed to exercising professionalism in the field of biomedical engineering while working to my best to ensure that established objectives are attained as I continue developing my skills. I aspire to work in a challenging environment that demands creativity, dedication, and innovation.

EDUCATION BACKGROUND

September 2023 to 2025: Kenya Medical Training College, Nairobi Campus.

- Diploma in Medical Engineering
- Pass

September 2021 to 2023: Kenya Medical Training College, Nairobi Campus.

- Certificate in Biomedical Engineering
- Pass

January 2017 to 2021: Gatimu Girls Secondary School.

- Kenya Certificate of Secondary Education (KCSE)
- Grade: C (plain)

January 2009 to November 2016: Ndaragwa Primary School

- Kenya Certificate of Primary Education (KCPE)
- Marks: 290/500

WORK EXPERIENCE

November 2025 – Present: Kitui County Referral Hospital

Hospital biomedical engineer

- Workshop organization and safety

- Evaluating the safety, efficiency and effectiveness of medical equipment, report and implement recommendations
- Installation, adjustment, maintenance, repair of cold chain fridges and air conditions or providing technical support for biomedical equipment and electrical works
- Fault diagnosis, repair and maintenance of electrical installations for cold chain fridges and air conditions
- Developing and implementing planned preventive maintenance schedules to minimize machine interruptions

17th February – 11th April 2025: Industrial Attachment – Kitui County Referral Hospital

- Assisted in equipment installation, adjustment, and maintenance support.
- Diagnosed and repaired biomedical and electrical systems.
- Took part in implementation of preventive maintenance schedules.

20th March – 12th May 2023: Industrial Attachment – National Public Health Laboratory (NPHL)

- Calibrated laboratory equipment (pipettes, thermometers, balances, timers).
- Carried out routine equipment maintenance

26th September – 18th November 2022: Industrial Attachment – Nakuru County Referral and Teaching Hospital

- Maintained and repaired medical equipment.
- Assisted in Calibration and testing of biomedical devices.
- Took part in equipment installation.

OTHER PROFESSIONAL QUALIFICATIONS

May 2021 – July 2021: Nyandarua National Polytechnic

- Computer packages (Microsoft word, Microsoft excel, Microsoft PowerPoint, Microsoft Access, Adobe pacemaker & MS publisher, internet and emails)

PIONEER PROJECT

As part of my diploma in Medical Engineering, I designed and developed an Automatic Light Intensity Adjustable System for a Theatre using an Arduino microcontroller, LDR sensor, LCD Display, and LEDs. The system was built to automatically regulate theatre lighting based on ambient conditions, ensuring consistent illumination during surgical procedures. This project demonstrated my ability to integrate biomedical engineering principles with practical problem solving to improve healthcare technology.

KEY SKILLS

- Installation, calibration, and maintenance of medical equipment (patient monitors,

- Infusion pumps, suction machines).
- Fault diagnosis and repair of devices (centrifuges, autoclaves, oxygen concentrators).
- Preventive maintenance of theatre lights and sterilizers.
- Calibration of lab tools (pipettes, balances, thermometers, stopwatches).
- Electrical installation and troubleshooting in hospital settings.
- Adherence to safety and biosafety standards.
- Able to work effectively in a team to achieve set goals.
- Strong problem-solving ability in technical and clinical settings.
- Quick to adapt to new environments and emerging medical technologies.
