PROFESSIONAL SUMMARY

Results-driven Mechanical Engineer and Technical Sales Professional with 5+ years of experience in presales, business development, renewable energy, industrial utilities, and technical solution selling. Experienced in proposal preparation, tender responses, costing, client presentations, market research, and closing high-value engineering projects. Proven ability to translate customer requirements into revenue-generating solutions.

CORE COMPETENCIES

- Technical Sales & Business Development
- Industrial Energy Solutions
- Biomass Boiler Systems & Steam Generation
- Renewable Energy Systems
- Solar Water Pumping Solutions
- Project Development & Management
- Energy Audits & Cost Optimization
- Tendering & Proposal Preparation
- Key Account Management
- Contract Negotiation
- Stakeholder Engagement

PROFESSIONAL EXPERIENCE

1. Technical Sales Engineer | Lean Energy Solutions Ltd | 2024 – Present

- Lead business development activities for biomass energy, steam generation, and industrial energy optimization projects.
 - Develop BOO (Build-Own-Operate) proposals enabling clients to eliminate capital expenditure while achieving guaranteed operational savings.
 - Conduct technical site assessments, energy audits, and feasibility studies for manufacturing, hospitality, and food-processing clients.
 - Build and manage a pipeline of high-value industrial energy projects across Kenya.
 - Prepare technical-commercial proposals, financial analyses, and client presentations.
- Key Achievements:
- Developed and managed energy opportunities valued at over KES 500 million.
 - Structured projects delivering projected client savings exceeding KES 2 million per month.
 - Expanded market penetration across manufacturing, hospitality, and agribusiness sectors.

2. Technical Sales Engineer | Zenith Steel Fabricators Ltd | 2022 – 2024

- Managed sales and project development activities for steel fabrication, storage tanks, pressure vessels, and industrial engineering solutions.
- Prepared quotations, technical proposals, and tender submissions for industrial engineering projects.
- Coordinated project execution between clients, fabrication teams, and contractors.
- Developed strategic relationships with industrial and commercial clients.

3. Sales Engineer | Davis & Shirtliff Ltd | 2020 – 2022

- Managed sales and business development for water pumping, solar, and energy solutions.
- Designed and promoted solar-powered borehole systems and water infrastructure projects.
- Delivered technical presentations, product demonstrations, and customer training.
- Supported project implementation and after-sales technical support.

SELECTED PROJECT HIGHLIGHTS

- Solarization of boreholes and water supply systems across Kenya.
- Development of biomass boiler conversion projects for industrial clients.
- Supported customers in reducing energy and operational costs through efficient pumping solutions.
- Industrial energy transition projects focused on replacing diesel and HFO with sustainable biomass fuels.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Mechanical Engineering – University of Nairobi (Upper Second Class Honors)

Graduate Engineer – Engineers Board of Kenya (EBK) (B15793)

ISO 9001:2015 & ISO 45001:2018 Certifications
