Medical Engineering Professional

SKILLS

Equipment Installation | Calibration | Preventive Maintenance | Corrective Maintenance | Electrical Safety Testing | Fault Diagnosis | Equipment Repair | Technical Documentation | Inventory Management | Spare Parts Procurement | Vendor Coordination | ISO Audit Support | Hospital Equipment Support | Product Demonstration | After-Sales Technical Support | Troubleshooting | Report Writing | Departmental Coordination

PROFESSIONAL SUMMARY

Results-driven professional with a strong background in medical equipment installation, calibration, maintenance, and repair across hospital environments. Skilled in preventive and corrective maintenance, electrical safety testing, inventory management, and technical documentation, ensuring compliance, uptime, and operational efficiency in fast-paced healthcare facilities. Experienced in cross-departmental hospital support including ICU, radiology, laboratory, and theatres, as well as in internal audits aligned with ISO standards. Recently expanded into customer service engineering, excelling in client engagement, product demonstrations, and after-sales support. Highly adaptable and detail-oriented, with a proven ability to troubleshoot under pressure, streamline technical operations, and deliver consistent service excellence.

CAREER STRENGTHS

- **Analytical Thinking & Problem-Solving:** Troubleshoots complex equipment faults, assesses maintenance issues, and implements effective technical solutions to minimize downtime.
- **Critical Thinking & Decision-Making:** Evaluates equipment performance and service needs to make informed decisions during diagnostics, procurement, and repair processes.
- **Attention to Detail & Accuracy:** Ensures precision in calibration, technical reporting, and compliance checks, maintaining high standards in equipment functionality and safety.
- **Team Collaboration & Leadership Skills:** Works closely with hospital departments, engineers, and customer service teams to coordinate maintenance tasks and support shared service goals.
- **Communication Skills:** Clearly conveys technical information to clients, end-users, and supervisors, enhancing understanding and fostering effective support and training.

PROFESSIONAL EXPERIENCE

Sales Engineer & Customer Service | September 2024 – Jan 2026
Medigenix Medical Supplies

Key Contributions

- Delivered timely frontline technical support, resolving engineering-related inquiries and service requests with a high first-contact resolution rate.
- Minimized client downtime by effectively coordinating troubleshooting efforts and ensuring swift technical resolution.

- Installed, calibrated, and maintained over 50+ medical and laboratory devices, improving equipment uptime by 30% and ensuring full compliance with healthcare standards
- Delivered technical support and user training to 20+ healthcare facilities, enhancing staff efficiency and reducing service requests by 25%
- Prepared and presented more than 10 technical proposals and tenders monthly, strengthening client confidence and winning key institutional contracts
- Coordinated cross-functional collaboration with suppliers and engineering teams, cutting procurement lead times by 20% and improving service responsiveness
- Led the installation and equipping of kangemi health Hospital Mother and Baby Unit that included delivery, theatre, NICU and NBU.
- Sold biomedical and laboratory equipment to 30+ hospitals, driving a 20% rise in sales revenue
- Trained 50+ healthcare professionals, boosting equipment use and client satisfaction by 35%
- Partnered with procurement teams and clinicians to tailor solutions, cutting errors and delays by 15%
- Managed after-sales service, resolving 95% of issues on time and strengthening customer

Maintenance Engineer (Contract) | February 2022 – July 2024

P.C.E.A Kikuyu Hospital **Key**

Contributions

- Ensured operational continuity by installing, calibrating, and repairing life-saving diagnostic and therapeutic medical equipment.
- Reduced equipment downtime by 40% through rigorous preventive maintenance (PPM) planning and execution.
- Enhanced patient and staff safety by performing routine electrical safety checks in accordance with national regulatory standards.
- Extended equipment lifespan by successfully restoring outdated and legacy systems to full functionality.
- Promoted accountability and efficiency by maintaining comprehensive records of service history, spare parts inventory, and technical documentation.
- Increased staff autonomy by training end-users on safe equipment handling and basic fault troubleshooting.
- Boosted emergency response times by delivering on-call maintenance support across critical departments including ICU, Theatres, and Radiology.
- Contributed to quality assurance by participating in internal audits and aligning maintenance practices with ISO standards.

Biomedical Intern | January 2021 – May 2021

Thika Level 5 Hospital **Key**

Contributions

- Supported clinical continuity by conducting daily rounds and maintaining medical equipment functionality in high-dependency units.
- Accelerated project timelines by assisting in installation, calibration, and functionality testing of a variety of medical devices.
- Helped reduce downtime by contributing to the development and rollout of preventive maintenance schedules.
- Improved device availability by responding to minor faults and aiding in repairs under senior supervision.
- Facilitated operational tracking by keeping detailed service logs and inventory records.
- Strengthened compliance by learning and applying documentation standards and safety procedures.
- Expanded knowledge through active participation in technical training sessions led by biomedical engineers and clinical staff.
- Gained real-world experience by shadowing professionals during emergency equipment support and hospital-wide quality audits.

EDUCATION

Diploma in Medical Engineering - Technical University of Mombasa | 2021

LANGUAGES

- English – Proficient
- Swahili – Proficient
