

KIPNGETICH DENNIS BETT

BIOMEDICAL ENGINEER

+254 742 718 573 | dennisbett551@gmail.com | Nairobi, Kenya

PROFESSIONAL SUMMARY

Dedicated Biomedical Engineer with hands-on experience gained at Kenya's leading referral hospital, Kenyatta National Hospital, and Kericho District Hospital. Proficient in maintenance, repair, and troubleshooting of advanced medical imaging systems including CT, MRI, and Linear Accelerator, as well as critical care equipment such as ventilators, infusion pumps, and patient monitors. Experienced in Planned Preventive Maintenance (PPM), electrical safety testing, equipment commissioning, and maintenance documentation. Passionate about patient safety and committed to building a reliable, compliant medical equipment infrastructure from the ground up.

TECHNICAL SKILLS

Clinical Equipment

- Medical imaging systems — CT, MRI, X-Ray, C-Arm
- Critical care equipment — Ventilators, Patient Monitors
- Infusion pumps, Syringe pumps, Defibrillators
- Laboratory equipment — Chemistry & Hematology Analyzers
- Dental units and Renal unit equipment
- Autoclave and sterilization equipment

Engineering & Technical

- Electrical safety testing — IEC 62353 / IEC 60601
- Planned Preventive Maintenance (PPM)
- Equipment commissioning and acceptance testing
- Troubleshooting and fault diagnosis
- AutoCAD — technical drawing and design
- Electrical installation and power systems

Documentation & Systems

- Equipment asset register and inventory management
- Maintenance forms and service records
- CMMS — asset tracking and PPM scheduling
- Acceptance testing reports and documentation

Professional Skills

- Cross-functional teamwork with clinical staff
- Clear technical communication and reporting
- Problem solving and analytical thinking
- Time management and task prioritization
- Adaptability and eagerness to learn

PROFESSIONAL EXPERIENCE

Kenyatta National Hospital (KNH) — Nairobi, Kenya

2023 – 2024

Biomedical Engineering Attachment & Volunteer

- Performed maintenance and repair of advanced imaging systems including X-ray machines, C-Arms, CT Scan, MRI, Cobalt-60 Machine, and Linear Accelerator — among the most complex equipment in Kenya's healthcare system
- Assisted in Planned Preventive Maintenance (PPM) of hospital equipment with a focus on laboratory devices, contributing to consistent equipment availability and patient safety
- Repaired and maintained critical care equipment including ventilators, syringe pumps, and infusion pumps, directly supporting ICU patient care continuity
- Serviced laboratory equipment including chemistry analyzers and hematology analyzers, ensuring accurate diagnostic results for clinical decision-making
- Monitored and maintained records of the hospital oxygen plant, including liquid oxygen system maintenance — critical infrastructure for patient care
- Participated in technical discussions for project design analysis and troubleshooting, contributing solutions to complex equipment challenges

Biomedical Engineering Attachment

- Performed troubleshooting and calibration of a CT Scan machine, restoring full diagnostic functionality for the hospital's radiology department
- Aided in the successful installation and commissioning of an autoclave machine, establishing a reliable sterilization system for the facility
- Performed troubleshooting of the hospital power plant, identifying and resolving electrical faults to restore stable power supply to clinical areas
- Performed electrical installation tasks and maintained maintenance forms and service records in compliance with hospital documentation standards
- Assisted in maintenance of dental units and renal unit equipment, broadening exposure across multiple clinical departments

EDUCATION

Kenya Medical Training College (KMTC) — Nairobi

December 2023

Diploma in Medical Engineering

Mombwo High School

2019

Kenya Certificate of Secondary Education (KCSE)

KEY COMPETENCIES

Patient Safety Focus

Equipment safety is always the first priority

Advanced Imaging Experience

CT, MRI, Linear Accelerator at KNH level

New Hospital Readiness

Ready to commission and build systems from Day 1

REFEREES

Mr. Josphat Bett

Biomedical Engineer
+254 720 799 407

Mr. Jared Ogweche

Biomedical Technologist — Kenyatta National Hospital
+254 724 863 343
