Introduction

Dedicated and detail-oriented Medical Engineering Technologist with strong academic training and hands-on experience in biomedical equipment installation, calibration, troubleshooting, and maintenance. Passionate about ensuring medical technologies operate safely and effectively to support quality patient care. I look forward to joining a growing organization to learn and use my expertise and skills in the growth of the organization.

Education

Higher National Diploma in Medical Engineering

Kenya Medical Training College (2023 - 2025)

Diploma in Medical Engineering

Thika School of Medical and Health Sciences (2019 -2022)

Kenya Certificate of Secondary Education (KCSE)

Tumutumu Girls High School (2015 - 2018)

Kenya Certificate of Primary Education (KCPE)

Springs Junior Academy (2007-2014)

Skills

- **Installation, calibration, and preventive maintenance of medical equipment:** Experienced in setting up, testing, and maintaining medical devices to ensure reliability and compliance with standards.
- **Troubleshooting and repair of diagnostic, laboratory, and monitoring systems:** Proven ability to identify technical faults and implement effective repair solutions.
- **Biomedical instrumentation and safety testing:** Skilled in conducting performance checks and ensuring safety compliance of hospital devices.
- **Knowledge of imaging technologies:** Familiar with X-ray, CT, ultrasound, and patient monitoring systems.
- **Technical documentation and user training:** Able to prepare manuals and train healthcare staff on proper device usage.
- **Regulatory compliance:** Familiarity with hospital equipment standards and regulatory requirements.
- **Marketing:** I have developed and gained skills in marketing and sales. This is inclusive of after sales support to clients.
- **Hospital Plants maintenance:** I have gained skills and ability to manage and maintain hospital plants e.g. Boilers and medical gases plants.
- **Problem solving:** I have skills that help in problem solving for both hardware, software and site occurrences.
