

Florence Hildah Wanjie,
Production Supervisor
Highchem East Africa

2nd December, 2025.

To Whom It May Concern,

I am pleased to recommend **Austin Vialli**, who completed their Chemical Engineering internship at **Highchem Group**. During thpis period, they demonstrated strong technical ability, professionalism, and quick adaptability to our manufacturing processes.

They supported daily production operations, assisted with data analysis, participated in troubleshooting exercises, and contributed to quality and safety compliance activities. Their grasp of engineering fundamentals, attention to detail, and clear communication made them a reliable member of the team.

Austin Vialli consistently showed discipline, willingness to learn, and solid teamwork. I am confident they will add value to any organization seeking a capable Chemical Engineering graduate. Should you require further information, please contact me at your convenience.

Sincerely,

 02/12/2025
