Education

Bachelor Biomedical Engineering, Future University
Graduation Project Smart glove-based gestures recognition system for Arabic sign language

2020 – 2025
Egypt

Professional Experience

Graduation Project, (Smart Glove for Hand Rehabilitation)

09/2024 – 06/2025
Egypt

- Designed a wearable device to assist patients with hand movement recovery
- Integrated sensors and control systems for motion tracking
- Focused on improving patient mobility and rehabilitation efficiency

Sales and Technical application, Ghalioungui
Internship

07/2024 – 08/2024
Egypt

Biomedical Engineering Intern, (Ain Shams University Hospitals)

Egypt

- Supported engineers in troubleshooting medical devices
- Observed installation and operation of clinical equipment
- Learned safety standards and hospital workflows

Global Medical City Hospital

Egypt

- Performed routine calibration of medical equipment to ensure accuracy and compliance with standards.
- Conducted daily inspection rounds to monitor device performance and safety.
- Identified and reported technical faults and equipment malfunctions.
- Assisted in troubleshooting and repairing minor issues under supervision.
- Participated in installation and commissioning of new medical devices.
- Carried out calibration and basic performance verification for medical devices according to standard procedures.

Agitech for Integrated Scientific Instruments (New Cairo, Egypt)

Egypt

Service Department Trainee

Key Responsibilities & Experience:

- Assisted in setup and installation of Metrohm titration systems
- Performed pH electrode testing and calibration
- Organized service tools and prepared service reports

Skills Gained:

- Basic knowledge of titration systems and electrochemical devices
- Laboratory safety and handling of analytical instruments
- Time management and technical reporting

- Communication with clients and service teams

Shifa Hospital

Conducted rotational visits across hospital departments to gain exposure to medical equipment and clinical workflows.

Learned about different types of medical devices used in each department.

Gained understanding of isolation rooms protocols and equipment handling.

Observed equipment usage, safety procedures, and maintenance practices.
