PROFESSIONAL SUMMARY

Biomedical Engineer with clinical experience . Skilled in medical equipment installation, maintenance, troubleshooting and staff training on safe use and operation. Experienced in supporting clinical teams to ensure equipment reliability and compliance with safety standards. Proficient in technical documentation, record keeping and working across multidisciplinary teams to improve patient care and service delivery.

PERSONAL INFORMATION

Date of birth: 27/04/2000

Age: 26 years

Marital status: single

EDUCATION

1.Bachelor of Biomedical Engineering[Honours]

Institution: Malawi University of Business and Applied Sciences [MUBAS] | 2019 –2025

Award: Honours degree in biomedical engineering second class

Relevant Coursework: Control Systems, Research Methods, Electric Circuits, Calculus

2.Malawi School Certificate of Education [MSCE]

Institution:Lakeview Secondary School | 2014 – 2018

Award: Msce certificate [13 Points]

WORK EXPERIENCE

- Biomedical Engineer Intern
- Zomba Central Hospital, Zomba, Malawi | Jul 2024 – Apr 2025
- Led user training projects for 30+ clinical staff on 5+ types of medical equipment, improving safe use and utilization
- Managed preventive and corrective maintenance schedules across 3 departments achieving 95%+ equipment uptime
- Coordinated troubleshooting and repairs with technicians and suppliers, reducing equipment downtime by 20%
- Maintained equipment logs, inventory records and compliance documentation for audits

VOLUNTEER EXPERIENCE

Biomedical Engineering Volunteer

Zomba District Hospital | 2025

- Supported maintenance of medical equipment in a low-resource setting, improving access for 200+ patients/month
- Conducted basic training for clinical staff on safe equipment handling and troubleshooting

PROJECTS & RESEARCH

- Arduino-Based Medical Device Prototyping | MUBAS 2023 – 2024
- Designed and built 3 low-cost devices: low cost spirometer, smart walking stick for blind/deaf, infant incubator
- Applied control systems and research methods to solve practical health technology challenges

Field Enumerator

- Malawi Population and Housing Census | 2018
- Conducted data collection for 150+ households, ensuring accuracy and confidentiality under tight deadlines

SKILLS

- Project & Operations: Project coordination, planning, scheduling, stakeholder engagement, reporting, logistics, inventory management
- Technical: Medical equipment maintenance, troubleshooting, installation, user training, C++, Arduino, control systems
- Compliance & Data: Documentation, data collection, quality control, audit preparation

Languages: English, Chichewa, Yao
