

ALVIN KIPROTICH

Technical Sales Engineer | Medical Equipment | Nairobi, Kenya

+254 716 924 634 • alvo.lagz@gmail.com • Nairobi, Kenya • Open to Relocation

PROFESSIONAL SUMMARY

Biomedical Engineer combining active clinical experience across four Kenyan healthcare facilities with hands-on B2B sales and business development in Kenya's medical equipment market. Currently interning at The Nairobi Hospital while independently running a medical equipment market intelligence and lead generation business — generating verified buyer and distributor leads for medical equipment suppliers. Recently concluded professional negotiations with Dawei Medical (Jiangsu) Co., Ltd., securing written authorization as their recognized Market Development Representative for Kenya. Holds manufacturer-level training from Dräger, Getinge, and Harley's Healthcare Solutions. Brings technical product knowledge, real hospital relationships, and active sales instincts directly applicable to a Technical Sales Engineer role.

KEY WINS

◆ Manufacturer Authorization	Secured written authorization from Dawei Medical (Jiangsu) Co., Ltd. as their recognized Market Development Representative for Kenya — June 2026, following professional B2B negotiations with their Sales Director.
◆ Commission Structure Negotiated	Agreed 8% fixed commission on first-order value with a 12-month introduction recognition period — negotiated via email with a Chinese manufacturer's Sales Director, zero prior relationship.
◆ Active Lead Generation Clients	Delivered verified lead lists to medical equipment clients including Galen Scientific Ltd — using a two-source verification standard (LinkedIn + domain confirmation) built from scratch.
◆ Market Mapping	Built a tiered database of Kenya's medical equipment supplier and distributor market, distinguishing Tier 1 formal operators from informal/unverifiable entities — original research with no equivalent public source.

CORE COMPETENCIES

B2B Sales & Business Development	Hospital & Clinic Relationship Building	Market Intelligence & Lead Generation
Medical Equipment Technical Knowledge	Manufacturer & Distributor Outreach	Negotiation & Commercial Structuring
Biomedical Equipment Maintenance (PPM)	Fault Diagnosis & Repair	Technical Documentation & Reporting

PROFESSIONAL EXPERIENCE

Founder & Market Intelligence Analyst <i>Biomedical Sales Intelligence Services Nairobi, Kenya</i> ■ Built and operate a B2B lead generation and market intelligence service for Kenya's medical equipment sector — generating verified buyer and distributor leads for medical equipment suppliers. ■ Conducted professional outreach and negotiations with international medical equipment manufacturers (China) — resulting in a formal written authorization as Market Development Representative for Dawei Medical (Jiangsu) Co., Ltd. for the Kenyan market. ■ Negotiated and agreed commission structure (8% of first-order value, 12-month recognition window) with Dawei Medical's Sales Director via email — zero prior relationship. ■ Built a tiered market database classifying Kenyan medical equipment distributors by operational tier: Tier 1 Formal, Tier 2 Semi-formal, and Ghost entries — original research with no equivalent public source. ■ Delivered verified lead lists to clients including Galen Scientific Ltd using a two-source verification standard (LinkedIn + domain confirmation).	2025 – Present
Medical Engineering Technician Intern <i>The Nairobi Hospital Nairobi, Kenya</i> ■ Daily maintenance, calibration, and repair of patient monitoring units, diagnostic instruments, and infusion systems in one of Kenya's busiest private hospitals.	2025 – Present

- Diagnose and resolve equipment faults independently — complex cases escalated with written fault reports detailing findings and rationale.
- Maintain complete PPM (Planned Preventive Maintenance) records for all equipment — every repair and inspection logged without exception.
- Working inside a high-throughput private hospital provides direct daily access to procurement decisions, equipment needs, and the clinical environment that medical equipment suppliers serve.

Technical Maintenance Attaché
2024

Nakuru Provincial General Hospital | Nakuru, Kenya

- Commissioned 10+ MEP system components (electrical, plumbing, mechanical) — all passed handover inspection without faults requiring rework.
- Ran structured PPM schedules across 20+ equipment units alongside qualified engineers.
- Produced commissioning and inspection documentation to hospital compliance standards.

Technical Maintenance Attaché
2022

Kapkatet Sub-County Hospital | Kericho, Kenya

- Serviced 5+ HVAC units across a multi-ward facility — first exposure to managing ventilation in a live clinical environment.
- Completed 30+ scheduled equipment inspections with full documentation.

Technical Maintenance Attaché
2021

Kericho District Hospital | Kericho, Kenya

- Calibrated and repaired 10+ electromechanical diagnostic devices under expert supervision — fundamentals of calibration instruments, tolerance standards, and fault escalation reporting.

EDUCATION

Diploma in Medical Engineering
2022 – 2024

KMTC Loitokitok Campus, Kenya
 Medical Instrumentation • Electronics • Mechanical Systems • HVAC • MEP Systems

Certificate in Medical Engineering
2020 – 2022

KMTC Loitokitok Campus, Kenya
 Medical Instrumentation • Electronics • Mechanical Systems

Kenya Certificate of Secondary Education (KCSE)
2019

Koelel High School, Kenya

CERTIFICATIONS & TRAINING

- Equipment Maintenance Training — Dräger & Nexus Medical
- Technical Training Programme — Getinge Healthcare Systems
- Technical Training Programme — Harley's Healthcare Solutions
- Authorization: Market Development Representative — Dawei Medical (Jiangsu) Co., Ltd., Kenya (June 2026)
