

LEAH KAGEHA LAGOSWA

Medical engineer | Biomedical Engineer | Equipment Servicing | Sales Support

Mobile no: 0740181701 | @kagehaleah69@gmail.com | <https://www.linkedin.com/in/leah-lagoswa>

Nairobi, Kenya

PROFESSIONAL SUMMARY

Results-driven Biomedical Engineer with hands-on experience in medical equipment maintenance, troubleshooting, preventive maintenance, installation, and technical support within healthcare environments. Skilled in fault diagnosis, equipment servicing, customer support, and user training, with a strong commitment to ensuring equipment reliability and minimizing downtime. Possesses certification training in diagnostic systems, demonstrating strong interest and foundational knowledge in laboratory healthcare technology. Adept at working independently in field service environments, managing customer relationships professionally, and delivering timely technical solutions. Passionate about supporting healthcare through reliable technical service, continuous learning, and operational excellence.

SKILLS

Technical Skills	Software
- Medical Equipment Installation & Maintenance - Technical Product Demonstrations - Preventive Maintenance (PPM) - Troubleshooting & Diagnostics - Quotation Preparation & Technical Proposals - CRM/ERP Documentation - Inventory Coordination	Microsoft Office (Word, Excel, PowerPoint)
	Professional Skills
	- Consultative Selling - Customer Relationship Management - Communication & Presentation - Problem-Solving - Analytical Thinking - Team Collaboration

EDUCATION

Diploma in Medical Engineering | Kabete National Polytechnic January 2021 – November 2023

CERTIFICATIONS

- R U 20 basic online training – (sysmex Feb 2026)
- Vayu CPAP Training – Vayu Global Health Foundation (November 2025)
- Medical Equipment Use, Repair, and Troubleshooting – Sternmed Company (January 2025 – April 2025)
- Heating, Ventilation, and Air Conditioning (HVAC) – LG (August 2024)
- Introduction to Medical Software – Yonsei University (November 2023 – January 2024)
- Foundations of Healthcare Systems Engineering – Johns Hopkins University (June 2022 – October 2022)

WORK EXPERIENCE

Biomedical engineer(freelancer) | MeDevice Africa March 2025 up-to-date

- Installed, maintained, and repaired laboratory and clinical equipment, ensuring optimal performance and minimal downtime.

- Diagnosed faults, performed preventive maintenance and calibration, and provided technical support and user training in compliance with safety and operational standards.
- Managed field service assignments, responded to service requests, maintained service reports, and supported client engagement and equipment demonstrations.

Biomedical Engineer | Mama Lucy Kibaki Hospital January 2025 – Present

- Achieved 99% efficiency in planned preventive maintenance (PPM) of diverse medical equipment, ensuring optimal functionality and longevity.
- Installed, maintained, and troubleshoot neonatal and critical care equipment, including incubators, phototherapy units, CPAP systems (Vayu), oxygen concentrators, patient monitors, infusion pumps, and syringe pumps.
- Executed troubleshooting, diagnosis, and repair of medical equipment with 99% safety and efficiency, significantly reducing operational disruptions.
- Ensured strict compliance with safety standards and Standard Operating Procedures (SOPs) in all maintenance activities.
- Offered technical guidance and support to clinical staff, enhancing their understanding and effective use of medical technology.

Key Achievements:

- Executed preventive maintenance and routine testing of biomedical equipment, improving system reliability and compliance with operational standards.
- Supported accurate documentation, data collection, and reporting of engineering activities, enhancing traceability and audit readiness.
- Assisted in troubleshooting and repair of medical and facility systems, reducing equipment downtime and maintaining service continuity.
- Contributed to inventory management and procurement of spare parts and consumables, ensuring timely maintenance interventions.

Biomedical engineer Intern | Gould Family Foundation | June 2024- January 2025

- Installed, maintained, and troubleshoot neonatal and critical care equipment, including incubators, phototherapy units, CPAP systems (Vayu), oxygen concentrators, patient monitors, infusion pumps, and syringe pumps.
- Performed preventive maintenance, calibration, corrective repairs, and provided technical support to clinical staff, ensuring safe, reliable, and compliant operation of neonatal devices
- Ensured strict compliance with safety standards and Standard Operating Procedures (SOPs) in all maintenance activities.

Pharmaceutical Store Attendant and telesales/ sales executive | Philmed Limited Jan 2024 – June 2024

- Managed pharmaceutical and medical equipment inventory, ensuring accurate stock levels and efficient supply chain operations.
- Generated and qualified B2B leads through high-volume outbound calls, promoting medical equipment and consumables while consistently meeting and exceeding sales targets.
- Conducted consultative sales calls to understand client needs, handle objections, negotiate pricing, and close deals effectively.
- Maintained accurate customer records, followed up on leads, and built strong client relationships to drive repeat business and revenue growth.

Medical Engineering Intern | Kenyatta University Teaching Research and Referral Hospital August 2022 – December 2022

- Performed troubleshooting, diagnosis, and repair of medical equipment with 95% efficiency, restoring critical devices to full operation.
- Successfully conducted planned preventive maintenance (PPM) on medical equipment, including dental chairs and imaging systems, achieving 100% efficiency and safety compliance.
- Executed the installation of new medical equipment, such as theatre lamps, with 100% efficiency and adherence to safety protocols

Community Outreach:

Integrated med solution Medical Equipment Assessment Initiative — Conducted assessments across 4–5 hospitals, identified equipment faults and maintenance gaps, and proposed practical solutions to improve reliability and performance.

Hopes dreams and dignity foundation. An initiative for supporting young women by funding their education and creating employments. **LANGUAGES**
