

TECHNICAL SALES ENGINEER

NASIMIYU GLORIA KHAMALA

Nairobi, Kenya

MOBILE NUMBER: 0769924682

EMAIL: Khamalagloria475@gmail.com

Personal information

Nationality: Kenyan

Gender: Female

Language: English and Kiswahili

Professional summary

A medical engineer graduate with a solid understanding of Medical devices, preventive maintenance, troubleshooting, installation , equipment inspection and healthcare technology applications within hospital environments. Able to communicate technical information clearly, understand users needs and facilitate identification of suitable solutions according to users needs. Worked within hospital environments during both my attachments and internship thus knowledgeable about their needs and effective approaches. Eager to build a career in technical sales engineer by combining my biomedical engineering knowledge with communication, relation building, problem solving and customer focused services.

Core competences

- Strong understanding of medical devices and healthcare technologies
- Medical Device Applications, Preventive Maintenance
- Team player with a positive attitude and a commitment to continuous learning
- Customer Needs Assessment
- Ability to build trust and maintain long term relationships
- Product Presentation and Technical Communication
- After-Sales Support Awareness
- Equipment Documentation and Reporting
- Inventory Support and Equipment Tracking
- Strong problem Solving and Analytical Skills
- Time Management and Organization skills
- Confident , proactive and proactive in a dynamic work environment

Professional Experience

Biomedical Engineering Intern

Lifecare hospitals Bungoma, from August 2025

- Performed preventive maintenance and functional checks on over 50 biomedical devices, building strong product knowledge and understanding of equipment performance, service requirements, and clinical user needs across hospital departments.
- Assisted in the installation and configuration of X-ray systems and other diagnostic equipment, gaining practical exposure to medical device setup, product application, and the technical support required for successful deployment in healthcare environments.
- Diagnosed and supported repair of faults in medical devices such as patient monitors and dental chairs, strengthening troubleshooting skills and the ability to identify equipment issues, explain technical problems, and support timely resolution for end users.
- Conducted routine biomedical equipment rounds across hospital departments to inspect devices and identify maintenance needs, developing a strong understanding of how different clinical users interact with equipment and the support they require.
- Inspected and tested ICU and NICU equipment to verify operational performance and safety, building familiarity with critical care devices and the importance of reliable technical support in high-dependency clinical settings.
- Assisted in calibration and safety testing of biomedical equipment, developing a strong understanding of device accuracy, compliance requirements, and the value of dependable equipment performance to healthcare providers.
- Trained healthcare staff on the correct operation of medical equipment, strengthening technical communication, user support, and presentation skills relevant to customer training and after-sales support roles.
- Documented maintenance activities and service logs in line with hospital procedures, contributing to accurate equipment records and gaining appreciation for organized service follow-up and support documentation.
- Responded to equipment faults reported by clinical departments, supporting troubleshooting and gaining practical insight into user concerns, service response expectations, and the importance of responsive customer support in healthcare environments.
- Worked across departments including ICU, NICU, radiology, theatre, laboratory, dental, dialysis, and general wards, building broad exposure to medical device applications and the differing equipment needs of healthcare clients.

Technical Exposure

- Patient Monitoring & Emergency Equipment: Patient monitors, ECG machines, defibrillators, suction machines, oxygen concentrators
- Critical Care & Neonatal Equipment: Anesthesia machines, baby incubators, baby warmers, phototherapy machines, CPAP machines
- Dialysis & Sterilization Equipment: Dialysis machines, autoclaves
- Diagnostic Imaging Equipment: X-ray systems, ultrasound, CT scan, MRI
- Laboratory & Dental Equipment: Laboratory equipment, dental chairs

Education

Bachelor of Science in Medical Engineering
Technical University of Mombasa | 2019 – 2025

Kenya Certificate of Secondary Education (KCSE)
St. Brigid's Girls High School | Mean Grade: B+

Additional training

Training provider- SternMed GmbH in collaboration with R.E.D- Right For Education Africa
Program name - Medical Device Essentials

The training was conducted over a three- month period. It covered a range of medical devices including medical imaging systems, intensive care units, and operating room equipment.
