CAREER OBJECTIVE

Aspiring Technical Sales Engineer passionate about connecting innovative medical technologies with healthcare providers to improve patient care.

PROFESSIONAL SUMMARY

Biomedical Engineer with over one year of practical experience supporting installation, maintenance, troubleshooting, and commissioning of medical equipment in busy hospital environments. Experienced collaborating with clinicians, suppliers, and multidisciplinary teams to ensure safe and reliable operation of healthcare technology. Possesses strong communication, presentation, and relationship-building skills with a genuine passion for medical devices, customer engagement, and helping healthcare facilities identify the right technical solutions. Eager to apply my technical expertise in a Technical Sales Engineer role.

CORE TECHNICAL SKILLS

- Technical sales support
- Medical equipment demonstrations
- Client relationship management
- Product presentations
- Preventive maintenance (PPM) and corrective maintenance of biomedical equipment
- Troubleshooting, fault diagnosis and basic repair support
- Equipment installation, commissioning support and functional testing
- Calibration support and post-service verification

EQUIPMENT EXPOSURE

Critical Care Equipment

- Patient Monitors
- Defibrillators
- Infusion Pumps
- Syringe Pumps

Diagnostic Equipment

- ECG
- Ultrasound
- X-ray

Theatre Equipment

- Anesthesia Machines
- Suction Units
- Sterilizers

Laboratory devices

Ward equipment

TECHNICAL TOOLS & SOFTWARE

- Microsoft Word, Excel, and PowerPoint
- Multimeter and electrical testing tools
- Basic electronics tools
- MATLAB
- AutoCAD

PROFESSIONAL EXPERIENCE

Biomedical Engineering Intern

The Nairobi Hospital, Nairobi, Kenya | May 2025 – Oct 2025

- Supported preventive and corrective maintenance of 50+ biomedical devices across theatre, ICU, wards, and laboratory units during a 6-month internship.
- Assisted in troubleshooting and functional testing of patient monitors, infusion pumps, suction units, ECG machines, and defibrillators, helping resolve equipment faults and return devices to service.
- Participated in weekly preventive maintenance schedules, documenting inspections, basic repairs, and service actions in maintenance logs.
- Coordinated with clinicians and vendors during equipment installation, testing, and user handover, ensuring equipment was safe and ready for clinical use.
- Contributed to maintenance documentation and service support workflows aimed at improving equipment availability and reliability in a busy hospital environment.

Medical Engineering Volunteer

Thika Level 5 Hospital, Kiambu, Kenya | Jan 2024 – Oct 2024

- Supported preventive and corrective maintenance of 40+ medical devices across inpatient wards, maternity, and theatre during a 10-month volunteer placement.
- Assisted in troubleshooting, calibration support, and functional testing of devices including suction machines, nebulizers, infusion pumps, patient monitors, and theatre equipment.
- Logged equipment faults, followed up on repair status, and supported PM schedules to improve service tracking and reduce delays in equipment return-to-use.
- Worked with clinical users to resolve day-to-day equipment issues and reinforce proper equipment handling practices.

Medical Engineering Attachment

Ganjoni Hospital, Mombasa, Kenya | Jan 2021 – Mar 2021

- Assisted with maintenance and repair support for hospital medical equipment in a clinical environment.
- Supported installation, inspection, and calibration-related activities for biomedical devices under supervision of the engineering team.

- Worked with clinical and engineering staff to identify equipment issues and support safe, functional use of medical devices.

Medical Engineering Attachment

Machakos Level 5 Hospital, Machakos, Kenya | Jun 2019 – Aug 2019

- Assisted with routine maintenance, troubleshooting support, and equipment inspection for biomedical devices in hospital departments.
- Supported engineering staff in identifying equipment faults, checking equipment functionality, and maintaining service continuity in clinical areas.
- Gained practical exposure to hospital medical engineering workflows, user support, and equipment safety checks.

EDUCATION

TECHNICAL UNIVERSITY OF MOMBASA

BACHELOR OF SCIENCE IN MEDICAL ENGINEERING

- Relevant coursework: Medical Instrumentation, Biomedical Signals Processing Systems, Medical Imaging, Hospital Engineering, Control Systems, Hospital safety.

KYENI GIRLS' HIGH SCHOOL

KENYA CERTIFICATE OF SECONDARY EDUCATION (KCSE)

PROFESSIONAL DEVELOPMENT

Forage – Siemens Mobility Operations Job Simulation

- Completed a process optimization and bottleneck analysis simulation focused on workflow improvement and layout redesign.

Forage – Data Labeling Job Simulation

- Completed a structured data-labeling simulation involving classification, QA review, and privacy-aware annotation workflows.

LANGUAGES

- English (Fluent)
- Swahili (Fluent)
- German (Basic Proficiency)
