Address: 510-00100 Nairobi, Kenya

CAREER PROFILE SUMMARY

A highly skilled and dedicated professional with expertise in maintaining and managing medical equipment. Proficient in implementing planned preventive maintenance, conducting breakdown repairs, and ensuring the installation of new medical equipment according to manufacturers' guidelines. I am adept at performing calibration and electrical safety tests on medical devices. Skilled in maintaining accurate records of maintenance activities and monitoring critical equipment uptime. I possess excellent interpersonal skills and the ability to work independently, exhibiting strong leadership and visionary qualities. Demonstrates exceptional planning, time management, and organizational skills, consistently delivering results in a fast-paced environment.

EDUCATION BACKGROUND

- **Diploma in Medical Engineering**, KMTC Nairobi campus; March 2023-Feb 2026
- **Kenya Certificate of Secondary Education-** Tumutumu Girls High, Nyeri, Kenya; Jan 2012-Nov 2015; (B-)

WORK HISTORY

Biomedical Engineering Intern

The Nairobi Hospital; March 2026 to Present

Duties and Responsibilities

- Daily pre-operational checks of medical equipment for operation clearance i.e. anesthesia, electro surgical unit, ventilator, etc.
- Troubleshooting and repair of medical equipment, i.e., OT, patient bed, massager, dialysis machine
- Managing utility system; disinfecting the R.O water plant, routine checks on oxygen PSA, and compressor plant
- Performing planned preventive maintenance on all medical equipment in various departments in the hospital.
- Record keeping of daily checklists of medical gases at the central gas plant, theatres and ppm schedules
- Supervise and assist in the repairs and servicing of contracted equipment by the suppliers

Biomedical Engineering Attaché
Thika Level 5 Hospital July 2025-Sept 2025

Duties and Responsibilities:

- Conducted troubleshooting and repair of diverse equipment in ICU, Theatre, Renal, Dental, Maternity, Radiology, Oncology, Laboratory, Laundry, and ENT.
- Daily checking of critical machines/equipment for operational clearance.
- Installed new equipment per manufacturer guidelines and ensured all equipment met necessary electrical safety standards.
- Monitored and reported on equipment uptime and participated in research with the guidance of senior lecturers.
- Took guidance and support from mentors, tutors, interns, student facilitators, and other junior staff supporting students' learning.
- Contributed to other activities related to the respective department's services and training by seniors.
- Followed the PPM schedule for each equipment/plant and carried out the general installation of medical equipment.
- Handled the calibration of medical equipment and ordered spare parts.
