

PERSONAL SUMMARY

I am a results-driven Quality Assurance professional with solid experience of over 3 years in pharmaceutical manufacturing and quality operations. Possesses deep technical knowledge of pharmaceutical formulations and a proven ability to communicate complex medical information to diverse stakeholders. Possesses solid understanding of drug products, quality standards, and regulatory compliance, combined with strong communication and relationship-building skills. Adept at ethical product promotion, compliance-driven promotion and healthcare education.

KEY SKILLS AND COMPETENCIES

cGMP / ISO quality systems implementation
and internal audit support

Quality control & inspection

Team player.

Medical & Product Knowledge

In-Process Quality Assurance (IPQA)

Technical Presentation

Strategic Planning

Team Supervision & Training

Health, safety and good laboratory practices

Process Monitoring & Continuous Improvement

Documentation, Audits & CAPA Management

Compliance & Integrity

WORK EXPERIENCE

August 2023-TO DATE ZAIN PHARMA LIMITED

Position: IPQA OFFICER

Key Responsibilities

- Provide on-floor quality and operations support across multiple production lines including tableting, oral liquids, dry syrups, encapsulation, creams, and ointments.
- Ensured products complied with cGMP, ISO standards, and regulatory requirements, strengthening understanding of quality, safety, and efficacy.

- Reviewed batch documentation and product specifications
- Perform equipment verification and calibration checks on balances, hardness testers, friabilators, disintegration machines, viscometers, and leak test equipment.
- Conduct product-focused training for operators and staff on cGMP and quality procedures
- Coordinate with production supervisors to resolve quality and process issues promptly, supporting uninterrupted production flow.
- Train machine operators, packers, cleaners, and maintenance staff on cGMP, hygiene, and quality procedures, strengthening shop-floor compliance culture.
- Inspect and approve raw and packaging materials before release to production.
- Document non-conformances, support root cause analysis, and participate in corrective and preventive action (CAPA) implementation.

Nov 2022 to June 2023: EGERTON UNIVERSITY

Position: Research Assistant

Key Responsibilities

- Operated advanced laboratory and pilot-scale equipment including HPLC, autoclaves, and rotary evaporators, ensuring adherence to SOPs and safety standards.
- Supported controlled production-like processes such as microbial fermentation and metabolite extraction, reinforcing process discipline and documentation accuracy.
- Conducted data analysis and maintained accurate technical records to support research outputs.
- Carried out bioassays against selected human pathogens to evaluate antimicrobial or biological activity.
- Maintained accurate documentation and research reports.

March 2022- June 2022: Attached at Kenya Agricultural Livestock And Research Organization (KALRO)

Key Responsibilities

- Prepare laboratory reagents according to established protocols.
- Carry out molecular biology techniques such as gel electrophoresis, PCR, and DNA extraction.
- Receive, label, and analyze samples (including toxin and tissue samples) following defined

procedures.

- Design and execute laboratory tests in line with standard operating procedures.
- Conduct experiments under controlled conditions to verify or reject hypotheses using scientifically sound methods.
- Organize and store chemical substances, reagents, fluids, and compressed gases in accordance with safety guidelines.
- Record data and results accurately in designated paper and electronic systems.
- Maintain laboratory equipment and assist in procuring or replenishing laboratory supplies.
- Ensure strict adherence to safety guidelines and maintain a clean, orderly laboratory environment.

August 2019-September 2019: Worked as an enumerator during 2019/2020 census Kakamega county.

Key Responsibilities

- Analyzing authenticity of the information provided.
- Assisting people in filling survey forms.
- Interpreting interview questions to the respondent.

May –August 2017: Volunteer teacher of Mathematics, Biology, English and History at St. Agnes Shibuye Girls High School.

EDUCATION BACKGROUND

Sep 2017- July 2022: Egerton University

Bachelor of science in Biomedical Science and Technology

Achievement: First class Honors

Jan 2013 - Nov 2016: St. Agnes Girls High School, Shibuye

Achievement: K.C.S.E (B+)

Jan 2004-Nov 2012: Kakunga Primary

School Achievement: B+

INTERESTS

- ❖ Participating in Environmental Conservation Activities
- ❖ Volunteering
- ❖ Participating in Community Development Projects
- ❖ Reading spiritual and motivational books

REFEREES

Duncan M. Wakoli

Research Assistant,
Centre for Global Health Research, KEMRI
