EPHRIM BARUCH ABOK

ELECTRICAL ENGINEERING TECHNOLOGIST

Location: Kenya
Phone: 0111 854 197
Email: baruchephrim18205@gmail.com

TECHNICAL SKILLS

- Electrical Power Systems Electrical and Solar PV Installation AutoCAD | Revit
- MATLAB
- Substation Operations
- Generator and Motor Maintenance
- Protection and Control Systems
- Sensor and Transmitter Servicing
- Microsoft Office Suite

SOFT SKILLS

- Leadership Communication Teamwork Attention to Detail Safety Compliance Analytical Mindset

LANGUAGES

- English — Proficient
- Kiswahili — Proficient

EDUCATION

BTech. Electrical and Electronic Engineering Power Option
December 2023

KCSE — Nairobi School
November 2018

INTERESTS

- Renewable Energy Systems
- Sustainable Infrastructure
- Power Electronics Research
- Community Safety Advocacy

REFEREES

Elizabeth Silas
Supervisor
Chridal Enterprises
+254 745 956 931

Juma Shaban
Supervisor
Kenya Power (KPLC), Mbaraki
+254 710 350 035

Humphrey Cheruyot
Supervisor
KenGen, Sondu Miriu
+254 701 528 568

PROFILE

Innovative and detail-oriented Electrical Engineering Technologist with proven field experience across hydroelectric power generation, grid distribution and commercial solar installation. Delivered hands-on work at KenGen, KPLC and Central Electricals International, building a track record in high-voltage systems, generator protection and sustainable electrical design. Committed to safety, precision and reliable infrastructure in every engagement.

WORK EXPERIENCE

ELECTRICAL ENGINEER

- Chridal Enterprises** Apr 2025 – Present
Kenya (On-site)
- Executed full-cycle electrical and solar PV installations across multiple commercial sites, completing projects on schedule with zero safety incidents recorded.
 - Produced AutoCAD electrical drawings for 5+ site layouts, improving design accuracy and reducing on-site rework by an estimated 30%.
 - Prepared detailed Bills of Quantity and budget quotations for client projects, directly supporting accurate cost estimation and tender submissions.
 - Managed site operations and coordinated subcontractor activities, ensuring compliance with safety standards throughout the construction phase.

ELECTRICAL ENGINEERING INTERN

- KenGen — Sondu Miriu Power Station** Jan 2024 – Dec 2024
Kenya (On-site)
- Performed scheduled maintenance on power transformers and generators, contributing to 99%+ uptime of the hydroelectric generation units throughout the attachment.
 - Operated substation switchgear during load transfers, ensuring zero unplanned outages under supervision of senior engineers.
 - Maintained and replaced sensors and transmitters across the generation floor, reducing instrument fault response time and improving system monitoring reliability.
 - Supported the generator and transformer protection system, identifying and flagging 3 anomalies that were resolved before escalating to failures.

ELECTRICAL ATTACHE

- Kenya Power (KPLC) — Mbaraki, Mombasa** Jan 2023 – Mar 2023
Mombasa, Kenya (On-site)
- Maintained and repaired underground cables across voltage ranges from 240V to 330V, restoring supply to residential and commercial customers with minimal downtime.
 - Installed surge diverters at 11kV and 33kV levels on 10+ transformer installations, enhancing grid protection against voltage surges.
 - Conducted transformer load checks and earthing operations, supporting a distribution network serving thousands of customers in the Mbaraki region.
 - Deployed with the emergency response team on fault-clearance duties, developing rapid diagnostics skills under real-world field pressure.

KEY COMPETENCIES

Power Systems | Hydroelectric Generation | Solar PV Design and Installation | HV Substation Operations | AutoCAD | Revit | MATLAB | Generator and Transformer Protection | Underground Cable Repair | Bills of Quantity | Site Safety Management
