Biomedical Engineering Technician

Medical Equipment Troubleshooting | Preventive Maintenance & Calibration | Medical Device Repair | Clinical Technical Support | Device Testing & Performance Evaluation | Equipment Documentation & Reporting | Biocompatible Materials Application | Equipment Data Analysis | Compliance & Safety Standards | Operation of Medical Devices | Biomedical Prototyping | Inventory & Asset Tracking | Cross-Functional Collaboration | Audit Readiness & Regulation Awareness | Engineering Tools & Measurement Instruments

PROFESSIONAL SUMMARY

Results-driven biomedical engineering technician with a strong background in medical device maintenance, calibration, and technical support. Skilled in equipment troubleshooting, preventive maintenance, and device performance evaluation, ensuring functionality, compliance, and patient safety in clinical environments. Experienced in hands-on hospital-based support, service documentation, and fault diagnosis, with a keen ability to minimize downtime and enhance equipment reliability. Highly adaptable to dynamic healthcare settings, capable of managing multiple technical tasks efficiently, and dedicated to optimizing biomedical engineering operations for maximum healthcare efficiency.

Career Strengths

- **Analytical Thinking & Problem-Solving:** Effectively identifies technical faults, analyzes device issues, and implements timely solutions to ensure uninterrupted equipment function.
- **Critical Thinking & Decision-Making:** Assesses equipment conditions and determines repair or replacement needs to support clinical efficiency.
- **Attention to Detail & Accuracy:** Maintains precise service records and ensures accurate calibration and compliance with safety standards.
- **Team Collaboration & Leadership Skills:** Collaborates with biomedical teams during internships to support maintenance tasks and learn technical procedures.
- **Communication & Interpersonal Skills:** Communicates clearly with hospital staff and engineers to coordinate repairs and convey technical findings.
- **Time Management & Organization:** Prioritizes maintenance schedules and multitasks effectively in high-pressure healthcare environments.
- **Adaptability & Flexibility:** Adapts quickly to new equipment, hospital protocols, and emergency situations during hands-on clinical support.

PROFESSIONAL EXPERIENCE

Biomedical Engineering Intern | September 2023– March 2024

The Nairobi Hospital – Nairobi, Kenya

Key Contributions

- Restored functionality of dialysis machines and critical care monitors by diagnosing faults and executing timely repairs, reducing equipment downtime and improving patient care continuity.
- Enhanced device reliability by executing scheduled preventive maintenance across high-usage units, minimizing breakdowns and extending equipment life cycles.
- Improved safety and compliance by assisting in the calibration and performance testing of biomedical equipment, aligning with hospital quality standards.
- Reduced documentation errors by maintaining accurate service logs, repair histories, and inspection records, supporting audit readiness and operational transparency.
- Supported clinical operations by providing technical backup during surgeries and ICU procedures, ensuring uninterrupted access to vital monitoring systems.

Biomedical Engineering Attachee | Dec 2022 – Feb 2023

Jaramogi Oginga Odinga Teaching & Referral Hospital (JOOTRH) – Kisumu, Kenya

Key Contributions

- Assisted in repairing diagnostic and therapeutic medical devices, contributing to faster service turnaround and improved departmental efficiency.
- Supported equipment calibration and routine servicing for infusion pumps, ECG machines, and autoclaves, ensuring consistent performance and patient safety.
- Improved record-keeping by updating maintenance logs and inspection checklists, strengthening compliance with biomedical regulations.
- Conducted routine equipment inspections, identifying faults early and reducing unexpected device failures in clinical units.
- Delivered prompt technical support during emergency cases, aiding healthcare teams in maintaining equipment readiness during critical procedures.

EDUCATION

Diploma in Medical Engineering | Jan 2021 – July 2023

Kisii National Polytechnic – Kisii, Kenya

LANGUAGES

? English – Proficient

? Swahili – Proficient
