

PHYLLIS MARERA

PHYLLIS MARERA

BSc Honours — Biomedical Engineering | University of Zimbabwe

PERSONAL INFORMATION

DOB	29/08/2002
Nationality	Zimbabwean
Gender	Female
Marital Status	Single
Phone	+263 71 408 4775 +263 774 221 393
Email	phyllismarera04@gmail.com
Address	11567 Glen View 7, Harare Zimbabwe
LinkedIn	www.linkedin.com/in/phyllis-marera

TECHNICAL SKILLS

- Biomedical instrumentation & clinical engineering
- Medical equipment installation, maintenance, and troubleshooting
- Diagnostic imaging systems (Dental X-ray, General X-ray, MRI monitoring).
- CAD/CAM & biomedical device design
- Data science, machine learning & biomedical signal processing
- Medical equipment user training and technical support

SOFTWARE & TOOLS

- CAD software (AutoCAD & Solid Works)
- MATLAB
- Python
- Java
- Microsoft Office Suite (Word, Excel, PowerPoint, etc.)

SOFT SKILLS

- Analytical problem-solving
- Technical writing & documentation
- Team collaboration
- Adaptability & willingness to learn

LANGUAGES

English
Professional proficiency

Shona
Native

PROFILE

Motivated and analytically driven Biomedical Engineering graduate from the University of Zimbabwe with final-semester results pending, currently trending towards an Upper Second Class Honours (2.1) classification. Experienced in medical equipment installation, maintenance, clinical engineering support, and biomedical technology projects through a full-year industrial attachment at Slowgrad Engineering (September 2024 – September 2025).

Gained hands-on exposure to diagnostic imaging and healthcare technologies, including dental X-ray systems, general X-ray equipment, MRI monitoring, and medical device support across hospitals in Zimbabwe. Skilled in equipment troubleshooting, technical documentation, quotation preparation, biomedical device development, and applying engineering principles to healthcare solutions.

Demonstrates strong technical ability, problem-solving skills, and cross-disciplinary thinking, supported by academic projects in medical device design, machine learning-based healthcare systems, and biomedical monitoring technologies.

EDUCATION

University of Zimbabwe 2021 – 2026
BSc Honours in Biomedical Engineering | Harare, Zimbabwe

- Degree Classification: Upper Second Class Honours (2.1)—trending; final results pending

INDUSTRIAL ATTACHMENT

Slowgrad Engineering Sept 2024 – Sept 2025
Biomedical Engineering Trainee

- Supported installation and commissioning of Phillips C90 X-ray systems at Parirenyatwa Hospital and Sally Mugabe Hospital, as well as installation and maintenance of X-Mind Dental X-ray systems and dental chairs across hospitals in different provinces of Zimbabwe
- Performed maintenance and software support for Acteon dental X-ray systems, including troubleshooting, system checks, and ensuring proper equipment functionality.
- Conducted installation, preventive maintenance, servicing, and troubleshooting of dental X-ray systems, dental chairs, and general X-ray equipment across hospitals in different provinces of Zimbabwe.
- Participated in MRI equipment monitoring at Parirenyatwa Hospital, gaining exposure to advanced diagnostic imaging technology and clinical engineering practices.
- Provided user training and technical guidance to nurses, dentists, radiographers, and doctors on the operation and proper use of medical equipment, ensuring effective adoption and safe equipment utilization.
- Prepared technical reports, maintenance records, inspection documentation, and equipment quotations to support biomedical engineering operations.

ACADEMIC PROJECTS

Year 5 Final Year Project

Water Level and Total Dissolved Solids (TDS) Monitoring and Alert System for Purified Water in Haemodialysis Plants

- Designed and Developed a biomedical monitoring system integrating sensors and alert mechanisms for real time monitoring of dialysis water quality and safety.

Year 3 Individual Project

Development of a Machine Learning-Based System for Prostate Cancer Prediction

- Developed a machine learning based predictive system applying data analysis and modelling techniques to support prostate cancer prediction and healthcare decision making.

Year 2 Group Project

Development of Urinary Catheter

- Participated in the design and development of a urinary catheter prototype as part of a biomedical engineering team project.

CLINICAL ROTATION EXPERIENCE

Parirenyatwa Group of Hospitals | 1 month

July 2023

- Observed maintenance procedures, equipment workflows, and safety practices within a healthcare environment.
- Gained Exposure to hospital clinical engineering operations and medical equipment management
