CAREER OBJECTIVE

As a graduate in both a certificate and a diploma in Medical Engineering, I aspire to become a professional biomedical engineer in both the health and industrial organizations.

I am an open-minded person who gets involved in activities to help promote quality health services. Ever ready to learn in matters beyond my knowledge that would help better my skills also. This includes both my engineering and personal skills.

I am committed to exceptional customer service and driven by challenges, with the ability to independently plan and manage diverse relationships.

EDUCATION BACKGROUND

Diploma in Medical Engineering	Kenya Medical Training College (KILIFI)	2023-2025
Certificate in Medical Engineering	Kenya Medical Training College (KILIFI)	2020-2022
KCSE	AIC KAPKOI SISAL SECONDARY SCHOOL	2016-2019
KCPE	NABISWA PRIMARY SCHOOL	2003-2015

WORK EXPERIENCE

WEBUYE COUNTY HOSPITAL – Biomedical Intern September 2021 – October 2021

Duties

- Participated in continuous improvement by generating suggestions, and engaging in problem-solving activities to support teamwork.
- Offered technical support.
- Performed and supervised the maintenance tasks within the organization.
- Provided training to staff for the quality assurance team.

TAVETA SUBCOUNTY HOSPITAL – Biomedical Intern – February 2022 – April 2022

Duties

- Helped test and calibrate equipment.
- Conducted research and wrote reports to support medical innovations.
- Assisted in installing and setting up biomedical equipment, and learning how to integrate devices into healthcare systems.

- Performed preventive maintenance by helping with routine inspections and upkeep of medical devices to ensure they work safely and efficiently.
- Kept detailed records of testing methods, calibration results, and equipment maintenance for regulatory and operational needs.
- Worked with senior engineers to troubleshoot and fix minor technical issues with biomedical equipment.

TAVETA SUBCOUNTY HOSPITAL - Biomedical Intern – September 2024 – November 2024

Duties

- Assisted with Equipment Testing and Calibration
- Conducted Research and Analysis by preparing reports to contribute to medical innovations and improvements.
- Supported Equipment Installation and Setup: Aided in the installation and setup of biomedical equipment, learning how to integrate devices within healthcare systems.
- Performed Preventive Maintenance: Assisted in routine inspections and maintenance of medical devices to ensure they function safely and efficiently.
- Documented Procedures and Results: Maintained detailed records of testing procedures, calibration results, and equipment maintenance for regulatory and operational records.
- Troubleshoot Equipment Issues: Worked with senior engineers to diagnose and resolve minor technical issues with biomedical equipment.
- Learning and Development: Participated in training sessions, shadowed experienced engineers, and stayed updated on emerging biomedical technologies and standards.
