

BRIAN TOOCHIN
Electrical & Electronics Engineer

Nairobi, Kenya | +254 713 074 923 | briantoochin@gmail.com

PROFILE

Electrical and Electronics Engineer with a specialization in Control and Automation with hands-on experience in power plant operations, electrical project execution, and industrial maintenance. Experienced in generator operations, plant monitoring, electrical troubleshooting, system inspections, and technical reporting. Proven ability to support safe and efficient plant operations while maintaining high standards of reliability and performance. Adept at interpreting technical documentation, analyzing operational data, and collaborating with multidisciplinary teams to deliver effective engineering solutions in industrial and energy environments.

WORK EXPERIENCE

Merculex Energy Solutions | Nairobi, Kenya — Intern | May 2026 – Present

- Performing energy audits for various companies as required by EPRA regulations.
- Installing solar PV for industrial and office use to reduce electricity costs.
- Offering energy management solutions for various companies

Wärtsilä | Nairobi, Kenya — Intern, Power Plant Operations | Feb 2026 – Apr 2026

- Assist in monitoring and operating engine power plant systems during shift operations.
- Support start-up, synchronization, and shutdown of generating units and auxiliary equipment.
- Performed maintenance and repairs on Wärtsilä W32V20 engines, including sensor replacement and component troubleshooting.
- Record operational parameters and maintain accurate shift logs.
- Observe plant safety procedures and emergency response protocols.

China Young Tai Engineering Limited | Nairobi, Kenya — Site Engineer | Feb 2024– Nov 2024

- Managed electrical installation projects from planning to completion while ensuring safety and quality standards.
- Coordinated on-site teams, materials, and schedules to maintain project timelines.
- Conducted testing and inspections of electrical systems to ensure operational reliability.

Safetrac Limited | Nairobi, Kenya — Intern | Nov 2023 – Jan 2024

- Installed and maintained vehicle tracking electrical systems including wiring and diagnostics.
- Assisted in project implementation and troubleshooting of installed systems.

National Construction Authority | Eldoret, Kenya — Attachment | Feb 2022 – May 2022

- Prepared electrical layouts, bills of quantities, and specifications for building installations.
 - Conducted quality inspections to ensure compliance with electrical safety standards.
-

EDUCATION

- Technical University of Kenya | Nairobi — B.Eng. Electrical & Electronics Engineering | 2022
 - BSc in Electrical Engineering (Control & Automation) – *Including specialized coursework in Biomedical Instrumentation and Medical Device Systems.*
-

ACHIEVEMENTS

- Completed power plant operations internship at Wärtsilä engine power plant.
 - Managed electrical installation projects as Site Engineer at China Young Tai Engineering Ltd.
 - Conducted EPRA-compliant energy audits and supported solar PV installations at Merculex Energy Solutions.
-

SKILLS

- Electrical Systems: Installation, maintenance, troubleshooting, inspections
- Tools: Multimeters, clamp meters, electrical testing equipment
- Software: AutoCAD, Microsoft Excel, Word, PowerPoint.

- Professional: Teamwork, communication, attention to detail, adaptability
- Control Systems, Sensor Technology, Signal Processing, Technical Presentations
