

ALICE NYAMBEKI

Tel: 0792719738 | Email: nyambeki.mbeki@gmail.com | Location: Nairobi, Kenya

CAREER PROFILE SUMMARY

A highly motivated and detail-oriented Biomedical professional with hands-on experience in biomedical device development, equipment testing, and maintenance. Skilled in technical documentation, data analysis, and safety compliance testing within healthcare environments. Experienced in supporting medical equipment operations, collaborating with healthcare professionals, and ensuring optimal performance of biomedical systems. Passionate about improving healthcare outcomes through innovation and practical engineering solutions.

EDUCATION AND PROFESSIONAL BACKGROUND

Kisii National Polytechnic — Diploma in Medical Engineering

Moi Forces Academy – Lanet — Kenya Certificate of Secondary Education

Certification: Kenya Sign Language

KEY SKILLS AND COMPETENCIES

- **Biomedical Device Development:** Skilled in testing, calibration, and development of medical equipment for clinical applications.
- **Equipment Maintenance & Calibration:** Adept at maintaining and troubleshooting various biomedical devices to ensure safety compliance.
- **Technical Documentation:** Proficient in preparing detailed equipment reports and maintenance logs.
- **Data Analysis:** Experienced in analyzing test results and identifying performance improvements.
- **Safety & Quality Control:** Knowledgeable in biomedical safety standards and testing protocols.
- **Communication & Teamwork:** Strong interpersonal and collaborative skills when working with healthcare and engineering teams.
- **Administrative Support:** Capable of managing technical files, documentation, and record systems efficiently.

WORKING EXPERIENCE

Moi Teaching and Referral Hospital — Biomedical Engineer Intern

- Assisted in the development and testing of biomedical devices for patient care.
- Conducted equipment tests to ensure compliance with safety and performance standards.
- Supported the calibration, maintenance, and troubleshooting of biomedical equipment across hospital departments.
- Collaborated with healthcare professionals to gather feedback and improve device performance.
- Investigated and recommended design modifications to improve cost efficiency and usability.
- Organized and maintained detailed test records and analysis reports.

Divine Photography — Receptionist

- Managed client appointments, calls, and front-desk operations.
- Handled payments, invoices, and data entry tasks accurately.
- Provided administrative and clerical support to staff, including filing, scanning, and scheduling.
- Maintained a clean and organized reception area and ensured excellent customer service.

PROJECTS

Sensor-Based System for Predicting Falls in Elderly Patients

- Designed and developed a biomedical system using sensors to detect instability and predict potential falls among elderly patients.
- Integrated motion and vibration sensors for early detection of fall risk.
- Documented system performance, conducted data analysis, and recommended improvements for reliability and safety.
- Demonstrated innovative thinking in developing assistive healthcare technology aimed at reducing fall-related injuries.
