PROFESSIONAL SUMMARY

Biomedical Engineer graduate with practical experience in medical equipment maintenance, technical support, medical device development, equipment testing, calibration and technical documentation. Skilled in communicating technical concepts to healthcare professionals, conducting product demonstrations and user training, and collaborating with multi-disciplinary teams to deliver healthcare solutions. Passionate about combining technical expertise with customer engagement to support healthcare providers and improve patient outcomes. Currently focused on building a career in the sales domain, combining technical expertise with strong communication and relationship management skills to deliver effective solutions.

PROFESSIONAL EXPERIENCE

Volunteer Biomedical Engineer

Gonep Pharmaceuticals, Nairobi | July 2025 – Present

- Participated in development and testing of medical device prototypes (Clinic at Hand Medical device).
- Assisted in calibration of sensors and electronic modules to ensure accuracy.
- Supported preparation of technical documentation aligned with ISO standards.
- Delivered user training and technical guidance on device operation.
- Supported business development activities by identifying prospective healthcare clients.
- Assisted with product demonstrations and customer engagement activities.
- Collaborated with engineering and healthcare teams to improve product functionality.

Biomedical Engineer Intern

Gonep Pharmaceuticals, Nairobi | Jan 2025 – June 2025

- Performed device performance verification tests under ISO/CE compliance.
- Integrated sensors and programmed microcontrollers for prototype functionality.
- Conducted durability and functional testing and documented findings.
- Supported troubleshooting of electronic and embedded system faults.

Biomedical Engineer Trainee

Kenyatta University Teaching, Referral & Research Hospital (KUTRRH), Nairobi | Jan 2024 – Apr 2024

- Supported preventive maintenance (PPM) and inspection of ICU and ward equipment.
- Assisted in troubleshooting and basic fault diagnosis of patient monitors, infusion pumps, and ECG machines.
- Participated in calibration and functional verification of biomedical equipment.
- Maintained equipment logs, checklists, and service documentation.
- Assisted in installation and setup of medical equipment.
- Observed hospital safety standards and ISO-aligned procedures.

Biomedical Engineer Trainee

Aga Khan University Hospital, Nairobi | Jan 2023 – Mar 2023

- Assisted in installation and commissioning of biomedical equipment.
- Supported troubleshooting of laboratory and diagnostic equipment.
- Participated in routine inspection and functional checks of medical devices.
- Assisted in documentation of maintenance and service reports.
- Gained exposure to hospital biomedical workflows and equipment management systems.

EDUCATION

Bachelor of Science in Biomedical Engineering

Kenyatta University, Nairobi | Sep 2019 – Dec 2024
Second Class Upper Division

ICDL Certification

NIBS Technical College, Nairobi | Jan 2019 – Apr 2019

Kenya Certificate of Secondary Education (KCSE)

Kerugoya Girls High School | Mean Grade: A–

TECHNICAL EXPERTISE

- Medical equipment Planned Preventive Maintenance (PPM) and troubleshooting.
- Medical equipment development and testing.
- Calibration and functional verification of equipment.
- Medical equipment inspection, testing, and performance monitoring.
- Technical documentation, maintenance logs, and reporting.
- Basic embedded systems (Arduino, MicroPython).
- ISO standards exposure (ISO 13485, ISO-related processes).
- User training and product demonstrations.

CORE COMPETENCIES

- Problem-solving skills.
- Teamwork and collaboration.

- Communication and interpersonal skills.
- Attention to detail and accountability.
- Time management and adaptability.
- Analytical skills.

PROFESSIONAL DEVELOPMENT

- Continuous learning in biomedical equipment installation, maintenance and clinical engineering.
- Currently learning digital customer service

REFEREES

Eng. Antony Chuani

Head of Biomedical Engineering, KUTRRH
