Professional Summary

Results-driven Medical Engineer with a passion for advancing healthcare technology to improve patient care and public health, to create transformative social impact. Bringing hands-on experience in medical equipment maintenance, calibration and hospital safety standards. I excel in troubleshooting complex biomedical systems and maintaining meticulous traceability documentation records, ensuring optimal equipment performance, patient safety and regulatory compliance. Ready to use my technical acumen and strategic mindset to drive innovation, while collaborating across diverse teams involved in health care provision, to advance sustainability in healthcare delivery.

Education

Kirinyaga University [Sep 2021-April 2025]

Bachelor of Technology in Medical Engineering

Relevant Coursework: Medical Diagnostics, Rehabilitation Engineering, Biomedical Instrumentation I & II, Circuit Analysis, Medical Electronics, Biomaterials, Biosensors, Healthcare Technology Management I & II, Medical Profession and Practice, Project Management and Refrigeration.

Professional Experience

Medical Engineering Attache

Kenyatta University Teaching, Referral & Research Hospital (KUTRRH) Kenya | May 2024 – July 2024

- Performed planned and corrective maintenance on diagnostic equipment, including MRI, CT, X-ray, PET & SPECT resulting in 95% equipment uptime and minimizing downtime for critical diagnostic services.
- Spearheaded preventative maintenance, corrective maintenance and calibration of medical devices like Anaesthetic machines, ensuring optimal performance and compliance with healthcare regulations.
- Diagnosed technical faults in biomedical systems like in medical gas delivery systems, theatre lamps repair, and AGSS system by applying analytical problem-solving techniques to restore functionality.
- Utilized and maintained a range of lab equipment including spectrophotometers, PCR analyzers, Biosafety Cabinets and flow cytometers to ensure accurate testing and diagnosis in the lab.
- Developed a strong understanding of hospital safety protocols, ensuring devices adhered to established operational standards and also got well acquainted with various service manuals for equipment servicing.

Medical Engineering Attache

Kenyatta National Hospital Annex – Othaya (Mwai Kibaki Hospital) Kenya | May 2023 – July 2023

- Assisted in electrical installation and maintenance of hospital infrastructure, ensuring increase in uninterrupted medical operations by a solid 10%.
- Performed troubleshooting and servicing of Renal dialysis machine, ICU, HDU equipment like CRRT, ventilators, feeding pumps, Radiant warmers, and oxygen concentrators for critical care services.
- Proactively maintained laboratory equipment such as chemistry analyzers, autoclaves and lab environment ensuring optimal functionality and contributing to smoother and more efficient daily operations.
- Participated in Medical Gas system management and maintenance while ensuring 99.5% uptime of laundry and dryer machines through diligent servicing for critical sanitation use.
- Participated in basic operation and maintenance of standby generators, ensuring power reliability for various medical procedures.

Projects

Speech-Controlled Wheelchair for Individuals with Motor Disabilities: | [LINK](#)

- Designed and developed a wheelchair equipped with speech recognition technology, enabling voice-commanded mobility for individuals with total motor impairment.
 - Integrated real-time system processing to ensure responsiveness and user-friendly operation. Collaborated on hardware-software integration, ensuring seamless control for enhanced independence by 30%.
-

Skills

- **Medical Equipment Management** – Troubleshooting, maintenance, and calibration of hospital devices.
 - **Regulatory Compliance** – Knowledge of hospital safety protocols and equipment regulations.
 - **Biomedical Systems Integration** – Electrical and electronic diagnostics and repair.
 - **Soft skills** – Dependable, flexible, good communicator, problem solving and team leadership management.
-

Certificates

- **(AMEK) Association of Medical Engineering of Kenya (2025)** – Governing body.
 - **Advantage Training by Fluke Biomedical (2024-2025)** – Advanced Calibration Techniques for Medical Devices.
 - **Key Performance Indicator (KPI) Training (2025)** – Management and Performance Evaluation Methods.
 - **HP Business & Leadership Training (2024)** – Strategic Business Models & Leadership Development.
-
