Personal Profile

Results-driven biomedical engineer with a wealth of experience in both health facilities and medical equipment companies. Skilled in equipment installation, troubleshooting and maintenance, user orientation and training, client support, sales and marketing.

Education

Kenyatta University of, BSc in Biomedical Engineering

Sept 2018 – Jul 2024

SECOND CLASS HONOURS, UPPER DIVISION

Experience

Biomedical Engineer, Microvision Enterprises Ltd, Nairobi

Nov 2024 – Aug 2025

- Reduced time for medical/electrical equipment installation, troubleshooting, user orientation, maintenance and client support by 20%.
- Performed regular calibration of medical equipment, enhancing efficiency by 25%.
- Reduced equipment fault by 15% through the implementation of Preventative Maintenance Schedules for all the equipment.
- Boosted the Sales and Marketing of medical equipment by 15% through supporting the Sales and Marketing team.

Biomedical Engineer Intern, Kitengela Sub-County Hospital, Kajiado

Jan 2023 – Mar 2023

Biomedical Engineer Intern, Kitui County Referral Hospital, Kitui

Jan 2022 – Apr 2022

- Achieved more than 10% medical/electrical equipment availability through implementing the existing Preventative Maintenance Schedule.
- Reduced the workload by conducting troubleshooting and repair of air conditioning, medical gas, water supply and other systems.
- Conducted repair and maintenance of medical, power and electromechanical systems, devices and appliances
- Implemented Inventory Management and asset tagging of hospital equipment, cutting equipment downtime by 10%.

Certifications and Trainings

- CHEM 200 and Piccolo Chem Biochemistry Analyzers – Gesan Production (2024)
- Eaglenos Blood Gas and Electrolyte Analyzers – Eaglenos (2024)
- Electrical Safety Testing – OpenWHO.org (2024)
- First Aid – Kaya Courses (2024)
- Essentials of Good Distribution Practice – Kaya Courses (2024)
- Warehouse Management in Action – Kaya Courses (2024)
- FISH Protocol Basic Course – Caresphere Academy (2023)
- Sysmex Algorithms for RBC Diseases – Caresphere Academy (2022)
- Handling Tricky Specimens – Caresphere Academy (2022)
- Urinalysis Basic Online Training – Caresphere Academy (2022)
- Point-of-Care Testing for Kidney Disease – Caresphere Academy (2022)

Projects

Dosimetry-Based Ionizing Radiation Measurement and Protection System

Jan 2023 – Jan 2024 | Kenyatta University

- Researched and implemented a final-year project titled *The Design and Development of a Dosimetry-Based Ionizing Radiation Measurement and Protection System*
- Designed electrical circuitry with the integration of control logic for radiation measurement and monitoring.
- Applied sensors and microcontrollers for monitoring.
- Conducted simulations by the use of Matlab and Proteus Softwares.

Special Knowledge and Skills

1. Technical Skills

- Electrical circuit design and simulation (Proteus)
- Mechanical design and simulation (AutoCAD & SOLIDWORKS)
- Maintenance and repair of electromechanical and biomedical systems, devices and appliances.

2. Programming: C/C++, Machine Learning

3. Software: MS Office Suite (Word, Excel, PowerPoint)

4. Graphics Design: Adobe Photoshop, Adobe Illustrator, Canva

5. Soft Skills: Attention to detail, Analytical thinking, Adaptability, Team work and collaboration

6. Languages: English (Professional Proficiency) Kiswahili (Native Proficiency)
