The Hiring Manager,

Accord MedicalSupplies Limited.

Dear Sir/Madam

RE: APPLICATION FOR THE TECHNICAL SALES ENGINEER POSITION

I am writing to express my interest in the Technical sales Engineer position at your organization. I recently completed my Bachelors of Science in Medical Engineering at the Technical University of Mombasa and am eager to combine my technical knowledge with my passion for customer engagement and business development to contribute to your organization.

During my academic training and industrial attachments, I am very confident in the extensive knowledge and understanding of biomedical equipment that I gained including the installation, maintenance, repair, calibration, troubleshooting and preventive maintenance of a variety of biomedical equipment including Defibrillators, ventilators, ultrasound machine, X-ray machines and Patient monitors. I have performed calibration of medical equipment using the Fluke system and am very familiar with its operations. In addition, I am very informed with maintaining equipment documentation, which also includes performing daily checks on medical equipment to ensure proper functioning and compliance with safety and quality standards.

In addition to my technical background, I possess excellent communication and interpersonal skills, developed through customer-facing roles in sales and retail. These experiences strengthened my ability to build relationships, communicate effectively with clients and work towards achieving organizational goals.

Although I am at the beginning of my career journey, I am a fast learner with excellent problem solving ability, very detail oriented and a genuine willingness to grow. I am also very flexible to travel to develop new business opportunities as required.

Should you feel that I would benefit from additional hands-on experience before taking on the full role, I would be grateful for the opportunity to begin as an intern and prove my capabilities. I look forward to hearing from you. Thank you.

Yours faithfully

Mercy .A. Otieno
