

MICHAEL KIPKORIR

0719324043 | mikebirgen5@gmail.com | Nairobi, Kenya

Summary

I am a highly-qualified Junior Biomedical Engineer with experience in repair and maintenance of hospital equipment. I am also passionate in creating economical, environmentally-friendly designs that meet client needs and improve operations. I am a diligent and reliable individual skillful in conducting tests and inspections and preparing reports and calculations. More so, I am a decisive problem solver, analytical thinker and clear communicator thus committed to optimizing workflow processes and accurately completing assigned tasks.

Experience

St Luke's Orthopedic and Trauma Hospital | Eldoret, Kenya

Biomedical Engineer Attaché | 01/2023 - 03/2023

1. Conducting regular maintenance checks on medical equipment to ensure optimal performance.
2. Diagnosing and repairing faults in medical devices such as ventilators, X-ray machines, CT scanners, and infusion pumps.
3. Calibrating medical equipment to ensure accuracy in measurements and test results.
4. Providing training to medical staff on the proper use and maintenance of medical equipment.
5. Offering technical support and troubleshooting assistance to healthcare professionals.
6. Ensuring that medical equipment complies with regulatory standards and quality assurance protocols.
7. Participating in the evaluation and selection of new equipment based on performance and safety standards.
8. Managing inventory of spare parts and medical equipment to ensure availability when needed.
9. Keeping track of equipment usage, maintenance history, and lifecycle management.

Kiambu Level 5 Hospital | Nairobi, Kenya

Biomedical Engineer Attaché | 01/2022 - 04/2022

1. Installed, calibrated, and tested recently acquired biomedical equipment.
2. Executed preventive maintenance schedules to uphold the reliability of equipment.
3. Assessed proposed biomedical equipment through rigorous tests and evaluations.
4. Enhanced the performance of biomedical equipment by analyzing machine-patient interactions.
5. Conducted equipment operation demonstrations for users.

Skills

Organizational skills, Communications, Project Management, Engineering, Microsoft Office Suite, IoT, Environmental Management, Maintenance, Troubleshooting, Problem Management

Education

Kenyatta University | Nairobi, Kenya

Biomedical Engineering | 07/2024

- I have successfully graduated from Kenyatta University with a Bachelor of Science in Biomedical Engineering Second Class Honors (Lower Division)
- Successfully participated in a visit to Bamburi Children Home organized by Loving Heart Foundation in December 2017.
- Engaged in a mystery visitor tool at Muranga Level 5 Hospital in 2019, organized by Voluntary Service Overseas (VSO).
- Contributed to the success of the "Somesha Ndugu" organization at Kenyatta University, actively raising funds for the less privileged.

Nairobi School | Nairobi, Kenya

Computer, Sciences, Literature, and Mathematic | 12/2016

- Completed high school studies with a mean grade of A-
- Participated in math contests and symposiums, acquiring valuable math-related concepts
- Member of St. John's Club, where I learned first aid and wound care
- Active member of the Young Catholic Society (YCS), serving as vice chairman toward the end of my studies
- Played volleyball up to the county level

Teresia Primary School | Eldoret, Kenya

Literature, Math, and Sciences | 12/2012

- Successfully completed my K.C.P.E studies with 401 marks that saw me joining Nairobi School.

Languages

English, Swahili

Project

In my final year, I undertook a significant project titled "Design and Implementation of a low-cost negative pressure system for fluid removal from wounds." I successfully completed the prototype in 2023 and presented it to both my supervisor and the panel in January 2024. This project aimed to create an affordable solution for effectively removing fluid from wounds using a negative pressure system.

Seminars

- Association of Medical Engineering of Kenya teletraining series conference in 2020, covering professional skills and use and maintenance of essential newborn technologies
- Career Fair SBE for Biomedical Engineering in 2022, featuring talks by industry speakers and company exhibitions

Referees

- **Dr. June Madete**

Senior Lecturer – Biomaterials, Kenyatta University

Tel: +254 723525361

- **Dennis Kiprotich**

Head of Biomedical Department, St Luke's Orthopedic and Trauma Hospital

Tel: +254 727780466
