# Geoffrey Nyaga

Biomedical Engineer

## PERSONAL SUMMARY

Focused and innovative in Medical Engineering, with excellent communication skills and a proactive work ethic. Demonstrates strong problem-solving abilities and attention to detail in handling medical technologies and technical tasks. Passionate about advancing medical technologies to improve patient outcomes and healthcare delivery, while continuously learning and adapting to new developments in the field.

## WORK EXPERIENCE

### Attachee

May,2023 - August ,2023

### TECHNICAL UNIVERSITY OF MOMBASA

Participated in installation and setup of biomedical devices for practical use. Conducted routine inspections and basic calibration of equipment under supervision. Supported troubleshooting of faulty devices and identified possible technical issues. Maintained equipment records, inventory, and documentation. Followed and applied safety procedures and standard operating protocols. Collaborated with instructors and fellow students during practical sessions.

### Engineer

May,2024 - August,2024

### MERU TEACHING AND REFFERAL HOSPITAL

Delivered technical support and maintenance for various medical devices such as patient monitors, infusion pumps, and diagnostic equipment. Performed preventive maintenance, calibration, and fault diagnosis to ensure safe and efficient operation. Worked closely with clinical staff to resolve equipment issues, reduce downtime, and enhance service delivery while maintaining accurate records and adhering to safety standards

### Engineer

May,2025 - August ,2025

### THE AGA KHAN HOSPITAL MOMBASA

Maintained, installed, and serviced medical equipment including patient monitors and infusion pumps through routine inspections, calibration, and troubleshooting. Collaborated with healthcare staff to promptly resolve technical issues, ensuring minimal downtime, optimal performance, and compliance with safety regulations.
