PROFESSIONAL SUMMARY

Biomedical Engineering graduate with training in medical devices, ECG systems, defibrillators, and hospital laboratory procedures. Completed clinical training in a hospital environment and gained exposure to diagnostic equipment, patient monitoring systems, laboratory workflows, and healthcare technology. Seeking internships, trainee positions, or entry-level opportunities in Biomedical Technology, Clinical Engineering, Medical Devices, Healthcare Technology, or Research.

EDUCATION

BSc in Biomedical Science

Cyprus University

Graduated: February 2026

TRAINING & INTERNSHIP

Mindray Training – Defibrillator & ECG Systems

- 1 Operation of ECG and defibrillator systems.
- 2 Basic maintenance and troubleshooting procedures.
- 3 Biomedical equipment safety awareness.

Kolan Hospital, Cyprus – Biomedical/Clinical Internship (August 2025)

- 1 Assisted healthcare professionals in clinical operations.
- 2 Observed biomedical equipment maintenance activities.
- 3 Participated in laboratory workflow and diagnostic procedures.
- 4 Learned quality assurance and hospital safety procedures.
- 5 Gained exposure to patient monitoring technologies.

TECHNICAL SKILLS

- 1 Medical Device Maintenance
- 2 ECG Systems
- 3 Defibrillator Operation
- 4 Biomedical Equipment Troubleshooting
- 5 Preventive Maintenance
- 6 Biomedical Laboratory Techniques
- 7 Data Analysis & Scientific Reporting
- 8 Microsoft Word, Excel and PowerPoint

ACADEMIC PROJECTS

- 1 Medical Device Safety Analysis
- 2 ECG Signal Interpretation Study
- 3 Biomedical Laboratory Research Activities
- 4 Hospital Equipment Management Study

LANGUAGES

- 1 English – Fluent
- 2 French – Fluent
- 3 Swahili – Fluent
