SUMMARY

A final-year Mechanical Engineering student at Jomo Kenyatta University of Agriculture and Technology, with hands-on technical experience in automation, machine vision, and mechanical systems. Seeking to apply strong engineering knowledge and analytical skills to a technical sales role in the medical supplies sector. Demonstrated ability to communicate complex technical concepts, present project outcomes to panels and competition judges, and build collaborative relationships — including at an international level through the Cars4Mars rover challenge in Johannesburg. Eager to leverage engineering expertise to understand client needs, demonstrate product value, and develop new business opportunities for Accord Medical Supplies.

KEY SKILLS

Technical Product Knowledge and Presentation

- Able to translate complex engineering and technical specifications into clear, client-facing presentations, demonstrated through project presentations to academic panels and competition judges.

Relationship Building and Communication

- Effective communicator in team and cross-functional environments; collaborated with multidisciplinary teams in national and international challenges, adapting communication style to diverse stakeholders.

Analytical and Problem-Solving Skills

- Able to identify client-side technical problems and propose solutions, drawing on experience diagnosing pump faults, designing automation systems, and developing machine vision models.

Initiative and Business Development Mindset

- Proactively pursued international competition opportunities (Cars4Mars, Johannesburg) and independently explored new domains including automation and robotics; willing to develop new regional business opportunities.
-

EXPERIENCE

INDUSTRIAL ATTACHMENT II

June 2025 – August 2025

Novatech Engineering

- Developed machine vision models for object and facial recognition deployed in robotic surveillance navigation — demonstrating ability to present and justify technical solutions to engineering leads.
- Engaged with cross-functional teams to scope requirements, propose solutions, and communicate technical progress — directly transferable to client-facing technical sales interactions.

INDUSTRIAL ATTACHMENT I

May 2024 – July 2024

Nairobi Waters – Gigiri

- Maintained and repaired centrifugal pumps and electrical motors, ensuring operational uptime through preventive maintenance including mechanical seal inspection and bearing lubrication.
- Monitored pumping pressure, flow rates, and motor amperages to optimize hydraulic performance, developing a detail-oriented approach to equipment diagnostics relevant to medical equipment servicing.

INTERNAL ATTACHMENT

May 2022 – June 2022

JKUAT Workshop

- Gained hands-on machining and fabrication experience using lathe machines, milling machines, gear hobbing equipment, and welding; also participated in engine overhaul and assembly.

PROJECTS

Kilikawi Tiller Automation Challenge

April 2026 – June 2026

- Designing a clutch automation system and utility cart attachment for a commercial agricultural tiller — involves client brief interpretation, iterative design, and stakeholder communication.

Nakuja N4 Dual Deployment Parachute System

September 2025 – May 2026

- Final year project developing a dual deployment parachute system for the Nakuja N4 rocket within the Nakuja Space programme — requires precision engineering and systems thinking.

Cars4Mars International Rover Challenge

May 2025 – December 2025

- Led surveillance and object-identification system for a rover designed for lunar deployment; presented design solutions to international competition judges in Johannesburg, South Africa.

EDUCATION

BSc Mechanical Engineering (Expected August 2026)

Jomo Kenyatta University of Agriculture and Technology

- Relevant modules: Computer Aided Design & Manufacturing, Fluid Mechanics, Fluid Flow Machinery, Pneumatics & Electrohydraulics, Heat Transfer, Mechanics of Machines, Renewable Energy Sources, Energy Management, Computational Fluid Dynamics, Power Plants, Gear Mechanisms.

Kenya Certificate of Secondary Education

Chulaimbo Secondary School

- Relevant subject: Business Studies.

ACHIEVEMENTS

- Cars4Mars International Challenge, Johannesburg — 2nd Runners-Up and Best Creativity Award (2025).
- JKUAT Bridge Building Competition — 1st Place (2025).

ACTIVITIES & INTERESTS

- Reading (particularly engineering and business literature).
- Football (playing and watching).
