

MUTISO SAMUEL MWENDWA

Mechanical Engineer, Technical Sales Engineer | +254 704 761 238| tisoosam@gmail.com | Nairobi, Kenya

PROFESSIONAL SUMMARY

I am a Mechanical & Manufacturing Engineer with 4+ years in technical sales and design of steel construction solutions including steel tanks, steel towers and structural steel. Through my experience at Zenith Steel, I generated 30% YoY sales growth by combining technical consultation with accurate BOQs and site support. ISO 9001 and ISO 45001 certified. Proven ability to support construction projects from concept to delivery through technical expertise and client relations. Ready to drive revenue growth through technical expertise and client relationships.

SKILLS

- Sales & Technical: Technical Sales | Market Research | Solution Selling | Client Consultation | Tender/Proposal Writing | Contract Negotiation | After-sales services.
- Construction Design: Steel Structure Design | Steel Tanks Design | Load Calculations | Material Specs.
- Tools: AutoCAD 2D/3D | Fabrication Drawings | CRM and ERP | BOQ Preparation | Technical Presentations | MS Office Suite.
- Project management: Site Visits | Installation Support | QA/QC | ISO 9001:2015 QMS and ISO 45001 OHSMS | Stakeholder Coordination.

WORK EXPERIENCE

Technical Sales and Marketing Engineer - Zenith Steel Fabricators LTD(June 2024 to May 2026)

B2B sales of engineered solutions to institutional & commercial clients

- Drove 30% YoY sales growth by managing a full sales cycle: lead generation, client meetings, quotations, contract negotiation, project management and after-sales follow-up. Closed deals worth KES 25M monthly.
- Maintained client and project records in CRM for reviews with top management.
- Provided technical consultation on steel structures. Advised clients on design, load capacity, material specs per required standards.
- Prepared detailed technical proposals, BOQs and quotations for galvanized steel, steel tanks and steel towers translating complex specs into client-friendly solutions. Accuracy reduced material wastage and improved win rate.
- Produced fabrication/shop drawings in AutoCAD to bridge design and workshop. Interpretation of CAD drawings to clients. Reduced project lead time 40% by minimizing design-to-fabrication errors
- Conducted site visits for initial consultation and to assess project requirements, verify dimensions, and provide installation support. Improved client satisfaction and repeat business by 25%.
- Collaborated with the solar department for solar water pumping solutions.
- Upheld HSE standards as per ISO 45001 and ISO 9001 through internal audits.

Assistant Industrial Engineer - MAS Intimates EPZ(May 2022 to June 2024)

- Optimized production efficiency by 23% via LEAN and 5S.
- Analyzed production data using Excel and ERP tools to identify inefficiencies and improve process flow.
- Consulted with clients on new styles during pre-production stages and conducted CTQ/CTP analysis to ensure products met client specs, minimizing defects and client complaints.
- Coordinated with procurement and logistics to maintain material availability and meet tight deadlines.

Ground Support Equipment (GSE) Intern - Kenya Airways(July-October 2021)

- Maintained 85% average OEE by scheduling servicing, diagnostics and maintenance for mechanical, hydraulic, and electrical GSE systems.
- Ensured FAA and manufacturer compliance of equipment through routine inspections, reducing safety incidents during ground operations.
- Managed GSE parts inventory, supplies records and maintenance records in MS Excel to prevent stockouts and minimize equipment downtime.

Production executive intern - L'Oreal East Africa(May-August 2019)

- Monitored daily production rates and inventory to maintain 99% schedule adherence on packaging lines of production rates.
- Performed machine setup, testing and maintenance for conveyors and packaging equipment, reducing startup defects by 15%.
- Executed 5S implementation on shrink wrap and robotic packaging lines, improving changeover speed and workplace safety.

CERTIFICATIONS AND TRAINING

- PMP Certification - Ongoing
- ISO 9001:2015 QMS and 45001:2018 OHS Internal Auditor Training - 2026
- Fire Marshall and First Aid training - 2025
- Health and Safety Committee Training - November 2024.
- McKinsey Accelerate Program - December 2023.
- Industrial Engineering foundation training - April 2023.
- JFB training - October 2022 to March 2023.
- Security training – June 2021.
- AutoCAD Certificate - May 2017 to August 2017.

EDUCATIONAL BACKGROUND

Campus - University of Nairobi (2017-2023):

Degree: BSc. Mechanical and Manufacturing Engineering - Second Class Honors.

- Member of the Engineering Students Association

High school - Nairobi School (2013-2016):

KCSE: Mean grade - A-

- Deputy head of school in charge of talent development.

Primary school - Christopher Kiamba Memorial School (2003-2013):

KCPE: Marks 388(out of 500)

PERSONAL ATTRIBUTES

Problem solving | Organizational and planning | skills | Interpersonal and coaching skills | Negotiation and Presentation skills | Proactive and Self-motivated | Team-oriented and good collaboration skills.

REFEREES

Ian Kameri,

Head of Tank Division, Zenith Steel Fabricators,

+254 721 882 646.

Beryl Achieng,

Executive Industrial Engineer, MAS Intimates,

+254 700 046 393.

Brian Kimathi,

Structural Project Engineer, Zenith Steel Fabricators,

+254 758 469 494.
