

Grace Nduta

A highly motivated and results-driven **Biomedical Engineering professional** with a strong foundation in healthcare technology, medical devices, and clinical applications. Currently transitioning into a **medical sales role**, I bring a unique blend of technical expertise and customer-focused communication skills. I am passionate about improving patient outcomes by bridging the gap between complex medical technology and practical clinical needs. Known for my ability to explain product value to healthcare professionals, I am committed to providing innovative solutions, growing client relationships, and driving sustainable sales growth in the medical and pharmaceutical industries.
