The Hiring Manager

Accord Medical Supplies Limited
Unicorn Sales & Services Godowns, Warehouse No. 16,
Baba Dogo Road, Nairobi, Kenya

RE: APPLICATION FOR THE TECHNICAL SALES ENGINEER POSITION

Dear Hiring Manager,

I am writing to express my strong interest in the Technical Sales Engineer position at Accord Medical Supplies Limited. With a Bachelor of Technology in Medical Engineering, a solid technical background spanning medical imaging, laboratory, and critical care equipment, and proven hands-on experience driving sales and client training, I am uniquely positioned to add immediate value to your business development and technical support teams.

In my current dual capacity as a Biomedical Field Service Engineer and HVAC Technician, I do not merely service complex healthcare infrastructure; I act as a trusted advisor to clinical clients. I have successfully driven the sales of medical imaging diagnostics, laboratory equipment, specialized spare parts, and consumables. By translating sophisticated engineering concepts into clear, value-driven solutions for healthcare providers, I have repeatedly strengthened client relationships and identified new revenue streams.

Accord Medical Supplies Limited has an outstanding reputation for enabling healthcare delivery across East Africa through high-quality diagnostic, theatre, and ICU equipment. My background directly aligns with your portfolio. I have hands-on experience with the installation, calibration, and troubleshooting of advanced modalities including ultrasound systems, hematology/biochemistry analyzers, and theatre installations. Furthermore, my experience as a Biomedical Engineering Trainer equips me with the exceptional presentation and communication skills necessary to conduct compelling product demonstrations, handle technical objections, and close high-value B2B contracts.

I am highly motivated to leverage my technical insight and commercial acumen to help Accord Medical Supplies expand its market presence and deliver premium after-sales support. Thank you for your time and consideration. I look forward to the opportunity to discuss how my technical expertise and relationship-building skills can contribute to your team's success.

Yours sincerely,

Daniel Okoth Ndiege

PROFESSIONAL SUMMARY

Highly skilled Biomedical Engineer and Technical Sales Specialist with comprehensive expertise in medical equipment installation, consultative sales, and technical support. Adept at driving revenue growth for medical devices, imaging modalities, and laboratory analyzers by translating complex technical features into clinical benefits. Proven record of managing key customer accounts, delivering professional clinical training, and ensuring superior after-sales support to optimize client satisfaction and equipment longevity.

PROFESSIONAL EXPERIENCE

Biomedical Engineering Field Service & Sales Engineer

10/2025 – Present

Rafael Advanced Imaging Limited

- **Commercial & Sales Growth:** Actively drove consultative sales of medical imaging, diagnostic, and laboratory systems, parts, and consumables (e.g., syringe pumps, oxygen sensors), expanding company market reach.
- **Account & Client Management:** Maintained high-touch customer relationship communication to secure repeat business, resolve concerns, and achieve top-tier client satisfaction ratings.
- **Equipment Commissioning:** Managed the technical installation and commissioning of diverse medical equipment across diagnostic imaging (Ultrasound, X-Ray, CT scanners, Cath Labs), laboratory (analyzers), and critical care (ventilators, patient monitors).
- **Quality Assurance & Compliance:** Upheld strict quality assurance frameworks for sophisticated equipment to guarantee reliable medical operations and full alignment with regulatory standards.

HVAC Technician

10/2025 – Present

Rafael Advanced Imaging Limited

- Spearheaded the design and installation of 3 high-efficiency HVAC systems, optimizing the climate-controlled environments necessary for sensitive diagnostic imaging devices and realizing a 15% improvement in energy performance.
- Implemented customized preventive maintenance schedules to significantly minimize system down-time and control emergency overhead expenditures.

Biomedical Engineering Trainer / Lecturer

01/2025 – Present

JFC Munene College of Health Sciences

- Developed and delivered technical modules on Theatre, ICU, Renal, Maternity, Laboratory, and Medical Imaging infrastructure, sharpening presentation skills crucial for technical product demonstrations.
- Instructed on foundational engineering core components including Electrical Principles, Embedded Systems, Thermodynamics, and Human Anatomy.

Biomedical Engineering Locum

01/2025 – Present

Acutest Hospital

- Executed planned preventive and corrective maintenance across multiple fast-paced hospital departments (Laboratory, Dental, Imaging, Nursing).
- Oversaw strict quality assurance checks to maintain alignment with hospital and national safety guidelines.

Biomedical Engineering Attachment

11/2023 – 12/2023

The Mombasa Hospital

- Serviced critical medical devices, institutional air-conditioning systems, specialized medical gas installations, and kitchen/laundry infrastructure under Engineer Thomas Obuyu.

Biomedical Engineering Attachment

09/2022 – 12/2022

Jaramogi Oginga Odinga Teaching & Referral Hospital

- Conducted routine maintenance and repairs on industrial autoclaves, theatre tools, and laboratory equipment under the supervision of Engineer Judith Opondo.

EDUCATION

Bachelor of Technology in Medical Engineering

Second Class Upper
Division

Technical University of Mombasa, Kenya

Key Coursework: Healthcare Technology Management, Clinical Engineering, Medical Device Design, Biomedical Instrumentation, Medical Imaging Techniques, HVAC Systems.

Final Project: *Multimodal Seizure Prediction Device* – Created a portable, microcontrolled system utilizing EEG/ECG tracking sensors to detect early epilepsy indicators.

CORE TECHNICAL & SALES SKILLS

Technical B2B Sales: Consultative Sales, Key Account Management, CRM, Client Relationship Building.

Engineering Expertise: HVAC Systems, Electrical Principles, Embedded Systems, Circuit Design.

Equipment Modalities: Imaging (Ultrasound, X-Ray, CT), Lab Analyzers, Theatre & Intensive Care Units.

Professional Capabilities: Product Demonstrations, Competency-Based Training, Project Management.
