Professional Summary

Exceptional customer service, sales, and laboratory support professional with a strong foundation in service excellence, technical accuracy, and people-centered engagement across retail, hospitality, healthcare, and academic environments. Adept at balancing customer needs with organizational objectives, ensuring service delivery that is both efficient and respectful of quality standards. Demonstrates the ability to operate confidently in fast-paced settings while maintaining composure, attention to detail, and professional integrity. Strategic in approach to customer interaction, with a proven capacity to translate inquiries, concerns, and service requests into positive experiences that strengthen trust and long-term relationships. Proficient in front-desk operations, transaction handling, documentation, and service coordination, supported by formal training in analytical chemistry that reinforces precision, safety awareness, and structured problem-solving. Strong understanding of compliance, cleanliness, and procedural discipline, applied consistently across service and technical contexts.
