

CURRICULUM VITAE – AARON STIMA

FULL NAME: AARON BENJAMIN STIMA

St. James Chilomoni Parish

P. O Box 70

Blantyre.

Phone : +265884579264/+265998884266

WhatsApp : +265884579264

LinkedIn : <https://www.linkedin.com/in/aron-stima-79566727a>

Email : aronstima@gmail.com

PERSONAL INFORMATION

Date of Birth : 27th October 1994

Age : 31

Sex : Male

Nationality : Malawian

District of Residence : Blantyre

Current City of Residence : Chilomoni

District of Origin : Dedza

Traditional Authority : Kaphuka

Village : Mbera

Language : English & Chichewa.

Religion : Christianity

PROFESSIONAL SUMMARY

Result-driven biomedical engineer with BEng (Hons) from MUST and 3+ years' experience in medical equipment management, maintenance, and user training across public hospitals in Malawi. Proven ability to serve as technical liaison between healthcare facilities, MoH, and equipment distributors for maternal, neonatal, and theatre devices. Skilled in troubleshooting, calibrating, and sustaining critical equipment to enhance maternal and newborn care standards. Strong analytical, communication, and stakeholder coordination skills. Experienced in capacity building, inventory management systems, and evidence-based reporting. Committed to advancing healthcare outcomes through innovative biomedical engineering solutions.

CORE COMPETENCIES

Technical skills:

- Medical equipment installation, maintenance & repair | troubleshooting & calibration, Neonatal & maternal devices: infant warmers, phototherapy units, oxygen concentrators, patient monitors, dialysis machines.
- Equipment inventory management systems
- Preventive maintenance protocols
- AutoCAD, SolidWorks | Advanced MS Excel for data tracking | MS PowerPoint for training.

Program & Quality:

- Liaison with MoH, hospital & distributors
- Equipment performance monitoring & reporting
- Technical documentation & user manuals
- Quality improvement & clinical collaboration | Pre-service curriculum support | Training & capacity building.

Soft skills:

- Analytical & problem-solving | Stakeholder engagement | Excellent communication & interpersonal skills | Works independently & under pressure | Regulatory compliance | Detail-oriented.

PROFESSIONAL EXPERIENCE**1. Biomedical Engineer – Volunteer**

Blantyre District Health office, Ministry of Health | June 2024 – Present

Supporting maternal and neonatal healthcare delivery across Blantyre district health facilities

- Serve as primary technical liaison between 15+ health facilities, equipment distributors, and MoH for installation, maintenance, and repair of neonatal, maternal and operating theatre devices.
- Track, monitor, and document equipment status, including maintenance history and performance data using Excel and inventory management systems to ensure optimal functionality.
- Troubleshoot and resolve complex technical issues with oxygen concentrators, infant warmers, and patient monitors, reducing equipment downtime by 30%+ across district facilities.
- Conduct periodic performance reviews and provide evidence-based recommendations for equipment upgrade/replacements to ensure long-term sustainability.
- Coordinate and facilitate training for 60+ healthcare staff on equipment use, safety, and basic troubleshooting; created user manuals and preventive maintenance protocols.
- Collaborate with Neonatal, QI, and clinical teams to review equipment functionality and indicators and improve care standards.

2. Biomedical Engineer – Government internship

Blantyre District Health Office, Ministry of Health Jun 2023 – May 2024

- Supervised DHO biomedical maintenance projects across all health centers in Blantyre District.
- Conducted preventive maintenance on critical maternal and neonatal equipment to ensure compliance with NEST objectives.
- Provided technical support to multidisciplinary teams including electrical, plumbing, and carpentry during infrastructure upgrades.
- Produced comprehensive technical reports on equipment performance and QI lead on evidence-based biomedical interventions.
- Assisted procurement team in selecting medical equipment and identifying suitable vendors, supporting strategic planning for device usage sustainability.

3. **Biomedical Engineer – volunteer**

Queen Elizabeth Central Hospital | Jul 2022 – May 2023

- Supervised oxygen plant operations and performed maintenance on high – acuity neonatal and theatre equipment in Malawi’s main referral hospital.
- Installed and set up dialysis machines, patient monitors, and other critical devices; ensured calibration met clinical standards.
- Managed equipment inventory and conducted quality assurance assessments to identify bottlenecks and implement solutions.
- Supported clinical teams during emergencies by ensuring rapid technical response and equipment availability.

4. **Biomedical engineer – Work Integrated Learning**

Queen Elizabeth Central Hospital / MUST | Jul 2021 – Oct 2021

- Designed and prototyped a circuit controlling the height of an electric hospital bed to improve patient care ergonomics.
- Troubleshoot medical equipment daily and attended technical training sessions on device safety and operation.

EDUCATION

1. **Bachelor of Engineering with Honors in Biomedical Engineering**

Malawi University of science and technology (MUST) | Graduated: 29th June 2022

2. **Malawi School Certificate of Education (MSCE)**

Target (pvt) Secondary School, Blantyre | 2014

RESEARCH & PUBLICATIONS

- **CO – author**, “*Clinical Application of Chambo Tilapia Fish Skin Xenograft for Skin Tissue Regeneration*” – Journal of Surgical Research, 2025. Based on study at Zomba Central Hospital. <https://doi.org/10.1016/j.rerere.2025.07.003>

ADDITIONAL EXPERIENCE

National Supervisor/Coordinator – WHO polio SIA | Sep 2023 | Led Supplementary Immunization Activity in Balaka District

Research Assistance | MUST, Thyolo | Jun 2023 – Managed enumerators using CSPro, synchronized data.
