

VICTOR MUTUGI

[0759078598] [victormutugi.vmg@gmail.com] | Location: Nairobi Kenya

SUMMARY

Final-year Bachelor of Technology in Medical Engineering student at Kirinyaga University (Expected Graduation: 2026) with practical hospital experience in medical equipment maintenance, calibration, troubleshooting, servicing, inventory management, reporting, and user training. Demonstrated customer engagement and sales capability through six months of field sales experience. Strong technical foundation in healthcare technology, CAD, embedded systems, and problem-solving with interest in Technical Sales Engineering and medical technology solutions.

EDUCATION

Kirinyaga University

Bachelor of Technology in Medical Engineering

Expected Graduation: 2026

EXPERIENCE

Safaricom Ambassador

6 Months

Responsibilities:

- Promoted products and engaged customers in field sales activities
- Explained product features and addressed customer concerns
- Delivered customer support and maintained positive customer relationships
- Developed communication, negotiation, and sales skills

Industrial Attachment – 12 Weeks *Chuka*

12 Weeks

County Referral Hospital (Level 5)

Volunteer Experience – Additional 5 Weeks

- Assisted in calibration and servicing of medical equipment
- Supported troubleshooting and maintenance activities
- Maintained equipment inventory records
- Prepared maintenance reports
- Participated in user training activities

Industrial Attachment – 12 Weeks

12 Weeks

Kenyatta University Teaching, Referral and Research Hospital

- Supported medical equipment servicing and technical assessments
- Participated in calibration and troubleshooting activities
- Assisted in equipment documentation and reporting
- Worked with healthcare teams to support equipment functionality

PROJECTS

Final Year Project | Remote SpO₂ Monitoring Device with Smart Notifications and Alerts

- Identified a real-world healthcare challenge and designed a technical solution
- Developed a remote patient monitoring concept using embedded systems
- Integrated notification and alert functionality for improved monitoring response

Additional Projects

- Arduino-based engineering projects
- Computer-aided design projects using AutoCAD and SolidWorks

TECHNICAL SKILLS

Technical Sales Support

Medical Equipment Maintenance

Calibration and Troubleshooting

Preventive Maintenance

User Training and Support

Inventory Management

Customer Relationship Management

Technical Documentation

Product Demonstration

Engineering Problem Solving

Customer Service

Communication Skills

Software: AutoCAD, SolidWorks, Arduino IDE, Proteus, Microsoft Excel

Engineering: Medical Equipment Support, Device Troubleshooting, Embedded Systems Development, Technical Reporting, Equipment Servicing

REFEREES
