

DANIEL OKOTH NDIEGE

Nairobi, Kenya | +254797201200 | +254735934949 | ndiegedaniel6@gmail.com

SUMMARY

Highly skilled Biomedical Engineer with expertise in medical equipment installation, maintenance, and repair. Possesses a strong understanding of HVAC systems and electrical principles, proven by enhancing energy efficiency by 15% in previous roles. Adept at diagnosing and resolving complex technical issues, implementing preventative maintenance programs, and ensuring quality assurance for critical healthcare technology. Committed to optimizing equipment lifespan and reducing operational costs, contributing to reliable healthcare services.

WORK EXPERIENCE

HVAC Technician

RAFAEL ADVANCED IMAGING LIMITED

10/2025 – Present

- Spearheaded the installation and commissioning of 3 HVAC systems, achieving an average 15% enhancement in energy efficiency for advanced medical equipment.
- Executed diagnostics and repairs for complex HVAC issues, successfully minimizing operational downtime.
- Instituted a preventative maintenance program, which extended equipment lifespan and curtailed emergency repair expenditures.

Biomedical Engineering Field Service Engineer

RAFAEL ADVANCED IMAGING LIMITED

10/2025 – Present

- Managed the installation of diverse medical equipment, including imaging, laboratory, and critical care devices such as ultrasound, X-ray diagnostic machines, CT scanners, radiotherapy equipment, cath labs, endoscopes, analyzers, ventilators, injectors, syringe pumps, and patient monitors.
- Performed planned preventive and corrective maintenance on a wide range of medical imaging, diagnostic, laboratory, and critical care equipment.
- Executed repairs on medical imaging, diagnostic, laboratory, and critical care equipment.
- Contributed to the acquisition and procurement of new medical imaging, diagnostic, laboratory, and critical care equipment, as well as spare parts.
- Drove sales of medical imaging, diagnostic, and laboratory equipment, parts, and consumables, including items like syringe pumps and oxygen sensors.
- Ensured quality assurance for medical equipment and maintained customer service communication to guarantee client satisfaction.

Biomedical Engineering Locum

ACUTEST HOSPITAL

01/2025 – Present

- Carried out planned preventive maintenance on equipment across laboratory, dental, imaging, and nursing departments.
- Executed repairs on departmental equipment.
- Managed the installation and commissioning of new medical equipment.
- Ensured quality assurance for regulatory compliance.

Biomedical Engineering Trainer

JFC MUNENE COLLEGE OF HEALTH SCIENCES

01/2025 – Present

- Delivered training on relevant modules including Theatre equipment, Intensive Care Unit equipment, Renal equipment, Maternity equipment, Laboratory equipment, Medical Imaging equipment, Medical Gases, Medical Plants, and HVAC Systems.
- Instructed on Electrical Principles, Electrical Installations, Electrical Machines, Mechanics of Machines, Biomechanics, Engineering Mathematics, Thermodynamics, and Human Anatomy and Physiology.

Biomedical Engineering Attachment

THE MOMBASA HOSPITAL

11/2023 – 12/2023

- Performed repair, service, and maintenance on medical equipment, laboratory equipment, and devices within the theatre, intensive care unit, radiology, and renal departments.
- Serviced and repaired air conditioners (split and window types), refrigerators, and freezers.
- Troubleshoot electrical installations and electronics for medical appliances.
- Serviced and repaired water pumps, kitchen machines, laundry machines, and solar water heating systems.
- Adhered to hospital maintenance safety rules and gained knowledge of hospital medical gas systems.
- Worked under the supervision of Engineer Thomas Obuyu.

Biomedical Engineering Attachment

JARAMOGI OGINGA ODINGA TEACHING AND REFERRAL HOSPITAL

09/2022 – 12/2022

- Executed repair, service, and maintenance for medical, laboratory, laundry, theatre, and dental equipment.
- Managed refrigeration and air conditioning installation, repairs, and preventive maintenance.
- Acquired understanding of medical gas systems, electronics, electrical systems, hospital plants, and systems.
- Participated in welding, fabrication tasks, maintenance of autoclaves, and servicing water systems.
- Worked under the supervision of Engineer Judith Opondo.

EDUCATION

Bachelor of Technology, Medical Engineering

Technical University of Mombasa, Kenya

Second Class Honours, Upper Division

- Key Coursework: Medical Device Design, Biomedical Instrumentation, Medical Imaging Techniques, Clinical Engineering, Electronics, HVAC, and Healthcare Technology Management.
- Final Project: Multimodal Seizure Prediction. Developed a cost-effective, portable device utilizing ECG, EEG, and ESP32 microcontrollers to detect the onset of epilepsy.

High School Certificate

Naya Mixed Secondary School, Siaya, Kenya

Attained B+ grade

SKILLS

- | | |
|---|---------------------------------------|
| • Medical Equipment Maintenance | • Sales & Technical Support |
| • HVAC Systems & Electrical Systems | • Business Development |
| • Critical Care & Lab Systems | • Customer Relationship Management |
| • Embedded Systems & Circuit Design | • Programming & Simulation |
| • Data Analysis | • Competency Based Education Training |
| • Project Management & Team Collaboration | • Teaching & Mentoring |
