

BETHWEL KIPLAGAT

Eldoret, Kenya | +254 723 052127 | chepkwonybethwell@gmail.com

PROFESSIONAL SUMMARY

Results-driven Medical Representative and Medical Biotechnology Scientist with an established track record in high-stakes capital equipment sales, medical device leasing, and aggressive client acquisition. Highly skilled in navigating complex medical B2B environments, executing data-driven territory sales mapping, and consistently hitting high-volume targets. Combines deep clinical expertise in laboratory diagnostics with advanced persuasive selling, strategic negotiation, and professional client relationship management to translate scientific innovation into high-margin commercial growth.

CORE SALES & MEDICAL REPRESENTATIVE SKILLS

- **New Client Acquisitions & Lead Generation:** Proven mastery over strategic health ecosystem mapping, business lead qualification, and transforming cold accounts into high-value active facilities. Onboarded numerous facilities to expand regional market share.
- **Conversion Optimization & Pitch Articulation:** Exceptional capacity to synthesize intricate biotech, radiological, and molecular diagnostic procedures into clear, benefit-driven commercial pitches for medical administrators and specialist clinicians to maximize sales conversion rates.
- **Lease Negotiations & Capital Sales:** Expert at managing long capital asset sales pipelines, closing equipment contracts, and negotiating complex diagnostic machine leases (including the UNIRAD framework).
- **Key Account Management:** Experienced builder of sustainable client networks with medical directors, lab supervisors, and institutional stakeholders to guarantee long-term repeat business.

PROFESSIONAL EXPERIENCE

Medical Representative — *Jionee Medical Diagnostics Limited*

January 2026 – June 2026

- **Territory Expansion & Account Acquisition:** Engineered and executed a comprehensive health ecosystem mapping strategy across the region, successfully identifying high-yield healthcare providers and onboarding **over 50 new diagnostic facilities** into the Jionee mobile ultrasound and X-ray network to aggressively expand market footprint.
- **High-Value Contract Structuring & Leasing:** Formulated, negotiated, and completed **3 comprehensive imaging equipment leasing agreements** under the complex UNIRAD framework, securing predictable, long-term recurring revenue streams from tier-1 medical institutions.
- **Capital Equipment Sales Milestones:** Managed full-cycle B2B procurement pipelines to deliver the direct capital sale of **3 commercial-grade diagnostic X-ray machines** to prominent regional health centers; achieved these high-margin conversions through high-impact technical demonstrations and precise alignment with executive administrative budgets.

- **Key Stakeholder & Relationship Management:** Cultivated sustainable, high-trust networks with Medical Directors, chief radiologists, and institutional procurement boards, transforming transactional clinical product pitches into strategic business solutions to secure continuous repeat business.

Laboratory Attaché — *KEMRI, Walter Reed Project – Kericho*

May 2024 – August 2024

- **Molecular Biology & PCR Optimization:** Executed manual and automated nucleic acid isolation workflows and managed strict control parameters for Polymerase Chain Reaction (PCR) setups; minimized sample contamination and ensured high-fidelity replication for critical clinical research panels.
- **Electrophoresis & Biomarker Analysis:** Performed gel electrophoresis to separate and analyze nucleic acids and proteins, accurately verifying PCR amplification outcomes and documenting molecular weights against strict control ladders.
- **Flow Cytometry Execution:** Managed hands-on control parameters and data acquisition for the BD FACS Canto flow cytometry line, accurately profiling cellular populations and immunophenotyping clinical samples for primary infectious disease studies.
- **Advanced Clinical Microscopy:** Utilized specialized light and fluorescence microscopy to examine morphological characteristics of blood and tissue samples, identifying cellular abnormalities and ensuring high-precision diagnostic documentation.
- **Lab Analytics & Data Integrity:** Leveraged laboratory analytics to synthesize dense data arrays from high-throughput platforms like the COBAS C311 and Sysmex XT 4000i. Transformed raw instrument data into rigorous, compliant analytical logs to guide clinical research decisions.
- **Key Achievements:** Maintained a **100% flawless compliance record** with Good Clinical Laboratory Practice (GCLP) metrics and operational standard operating procedures (SOPs) during rigorous equipment calibrations. Selected to compile and deliver weekly inter-departmental laboratory panel presentations to senior principal investigators.

TECHNICAL PRODUCT KNOWLEDGE

- **Diagnostic Radiology Infrastructure:** Comprehensive technical knowledge of operational engineering and imaging application parameters for digital X-ray stations and mobile diagnostic ultrasound systems.
- **Molecular Diagnostics & Infectious Diseases:** Skilled in manual/automated nucleic acid isolation workflows, PCR controls, and standard operating setups for platform lines like GeneXpert, Abbott, and Roche COBAS systems.
- **Immunology & Serology Panels:** Functional experience operating diagnostic matrices for HIV screening pathways (including ELISA and Western Blot) alongside flow cytometry configurations.
- **Hematology & Clinical Biochemistry:** Trained in reviewing data arrays for metabolic panels, liver/renal functions, and automation protocols for comprehensive complete blood counts (CBC/DIFF).

EDUCATION

Bachelor of Science in Medical Biotechnology with IT (*Second Class Upper Division*) **2016 – 2025**

Maseno University, Kenya

Kenya Certificate of Secondary Education (KCSE) (*Grade: B+*)

2012 – 2015

Bartolimo Boys Secondary School, Kenya

CERTIFICATIONS

- Good Clinical Laboratory Practice (GCLP) Certification
